

What is Wellesley Renewable Energy?

- Through our Town-owned utility, the Wellesley Municipal Light Plant, you can buy **Renewable Energy** for all or part of your electricity use (10%, 25%, 50% or 100%).
- Most or all of the **Renewable Energy** will come from the Spruce Mountain Wind Farm in Maine

What Does Wellesley Renewable Energy Cost?

- There is a \$.04 per kilowatt hour surcharge for **Wellesley Renewable Energy**
- At the lowest participation level (10%), the monthly surcharge for the typical* household is \$3.40 (less than the current price for a gallon of gas)
- You can estimate your own monthly surcharge using the calculator on www.WellesleyRenewableEnergy.com or by calling the Town of Wellesley Municipal Light Plant Customer Service at 781 235-7600 X 3366
- Simple energy conservation measures can offset the surcharge for renewable
*"Typical" is defined as the midpoint of household usage levels, 850 kWh per month

How Do I buy Wellesley Renewable Energy?

- Just fill out your contact information on the sign up card or at www.WellesleyRenewableEnergy.com
- The surcharge will appear on your monthly utility bill. The Town will purchase more **Renewable Energy** on our behalf, as more people sign up
- There is no obligation, you can cancel or change your percentage (increase or decrease) at any time
- Your electricity will flow into your home as usual

Why Support Renewable Energy

- Support cleaner air and water
- Diversify New England energy sources to provide more energy independence and security
- Create more demand for renewable energy sources in order to encourage more development of these sources
- Support Town Meeting's goal to reduce Wellesley's carbon footprint by 10% by 2013, using 2007 as a base year
- Lower your carbon footprint. Signing up for 100% renewable is the equivalent to taking your car off the road for 9 months. That's how much carbon you can save.
