RES-21-144	Building Permit - Residential	GARY BRUNO	2/17/2021 18:58	93 WOODLAWN AVENUE, WELLESLEY, MA 02481	Alterations	Complete	62-32	Bruno, Gary A	1937	SR20	10000	617-320-6598	Basement Remodel:All work to be done is in the basement to create a nice laundry area, this work will consist of eliminating/demolition of a 7'x3' closet that currently sits directly under a front to back beam, there are 5 lally columns under this beam, of which 3 of the 5 are now not exposed and are built in to the framing of the existing closet. Once this closet is eliminated, all 5 lally columns will be exposed. In the new finished laundry area I will have the 3 lally columns box framed in for aesthetic purposes. I will increase the room size not only the closet size of 7'x3'but also a 9x12 area that is currently unfinished adjacent to the current closet. Therefore the basement will have a finished room of about 140square feet which will be for a nice laundry area with new high efficiency w/d, 2 cabinets to be hung near the w/d for detergents etc.. Separate HVAC dryer ducting permits will be pulled. The electrician will install approximately 6 recessed LED lights providing very optimal lighting in the laundry area. The finished area will have a finished ceiling height of 6'10". The beam that runs from front to back will be in this new laundry area. This beam will be painted and will have a finished height under the beam of just over 6'4". Separate plumbing and electrical permits will be pulled from the electrical and plumbing All Wellesley building code requirements will be met and adhered to. The w/d will need be moved 6'6" from its current location.	\$9,000.00

RES-21-235	Building Permit - Residential	Margot Phillips	3/20/2021 0:14	1 FLETCHER ROAD, WELLESLEY, MA 02481	Repairs	Active	65-5	John David Phillips III and Margot L Phillips	1920	SR20	18087	(617) 875-3045	We would like to repair and replace the floor of our existing two-car garage. This is part of a larger project in which we will repair and replace the existing apron to the garage and re-pave and widen the driveway. The rationale for this work is that the garage floor and apron have settled significantly and are cracking and causing structural problems . We have applied for and received a Negative Determination of Applicability with Wetlands to proceed with the driveway project.Groundswell Landscape Design is overseeing the project. The Building Permit we are requesting would be to jackhammer and remove the existing concrete floor. It would be replaced with 3/4 inch crushed stone aggregate, followed by a steel rebar grid approximately 18 inches throughout. Finally, there would be a poured concrete floor that would be 4 inches thick.	\$6,800.00
