Subject: 135 Great Plain Ave.

Michael,

In follow-up to our phone conversations regarding 135 Great Plain Ave..

- 1) We are in agreement with the gravity sewer option presented. I'm still curious on what units if any would have some form of a sewer injector or pump system to meet the gravity sewer elevation. I would ask that we are given the opportunity to review and comment with DPW on these once plans have been submitted.
- 2) With regards to the open recreational space, our feeling still remains that there should be an area which includes play structures for children that would be accessible for all residents. There are several fields and areas of open space available in that part of town however there are no playgrounds within reasonable walking distance for the residents.

Please let me know if you need anything additional from us.

Lenny
