

Join the effort to Reduce Junk Mail & Help the Environment!!

Cut back on catalogs, credit card offers and coupons and reduce the number of trees cut down to produce this junk mail. The Wellesley 3R (Reduce Reuse Recycle) Working Group is asking residents to take part in a town-wide effort to reduce this type of waste.

Each year, more than 100 million trees become paper for mail that goes into trash or at best, into a recycling bin. An enormous amount of resources also goes into making and distributing junk mail.

YOU can opt out of junk mail with [Catalog Choice](#)! Sign up and follow a few simple steps. Do it now before the upcoming holiday catalog season.

Wellesley's 3R Working Group is comprised of the Department of Public Works, Natural Resources Commission and the Sustainable Energy Committee. The group is collaborating on several initiatives designed to improve awareness and encourage participation to reduce waste throughout the Town.

For more information on what Wellesley is doing to reduce the amount of trash going to landfills, visit the [RDF webpages](#) on the Town of Wellesley website.
