Town of Wellesley

525 Washington Street
Wellesley, MA 02482

Letter of Transmittal

November 4, 2019

To the Honorable Board of Selectmen and Citizens of the Town of Wellesley:

State law requires the Town of Wellesley to publish at the close of each year a complete set of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) that are audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, we hereby issue this Comprehensive Annual Financial Report (CAFR) of the Town of Wellesley, Massachusetts, for the year ending June 30, 2019 for your review.

This report consists of management's representations concerning the finances of the Town. Consequently, management assumes full responsibility for the completeness and reliability of all of the information presented in this report. To provide a reasonable basis for making these representations, management of the Town has established a comprehensive internal control framework that is designed both to protect the Town's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the Town's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the Town's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that this financial report is complete and reliable in all material respects.

The Town's financial statements have been audited by Powers & Sullivan, LLC, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Town for the year ended June 30, 2019, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion on the Town's financial statements for the year ended June 30, 2019, and that they are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

The independent audit of the financial statements of the Town was part of a broader, federally mandated "Single Audit" designed to meet the special needs of Federal grantor agencies. The standards governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with legal requirements, with special emphasis on internal controls and legal requirements involving the administration of Federal awards. These reports are available in the Town's separately issued Report on Federal Award Programs.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The Town's MD&A can be found immediately following the report of the independent auditors.

Profile of the Town

The Town of Wellesley was incorporated in 1881 and is located in Norfolk County. It is approximately 15 miles west of Boston and is bordered by Natick on the west, Weston and Newton on the north, Needham on the east and southeast, and Dover on the south. It is approximately 10.51 square miles in area and, according to the 2010 U.S. Census records, has a population of 27,982 persons.

The main highways serving the Town are State Routes 9, 16, 135, 128 and the Massachusetts Turnpike. The Massachusetts Bay Transportation Authority (MBTA) provides railroad services to Boston and Framingham.

The Town operates under the Representative Town Meeting form of government with public officers serving as ex-officio members of the Town Meeting. The legislative body consists of 240 members elected by precincts. Administrative affairs are managed by a five member Board of Selectmen, with the assistance of an Executive Director.

The administration of the general government is the responsibility of a five-member Board of Selectmen; local school affairs are administered by a five-member School Committee; public works are administered by a three-member Board of Public Works; the Municipal Light Plant is administered by a five-member Municipal Light Board that is comprised of the three-member Board of Public Works and two members appointed by the Board of Selectmen; and library affairs are administered by a six-member Board of Library Trustees.

General governmental services are provided within the town's boundaries; including public education in grades kindergarten through twelve, police and fire protection, collection and treatment of sewage, water distribution, electric services, public works, streets, parks and recreation, veteran's services, health and sanitation, and libraries. The water and sewer enterprise funds are self-supporting. The Town maintains a solid waste recycling and disposal facility.

The Town owns and operates a self-supporting municipal light plant. The Municipal Light Board carries out the responsibilities of the Municipal Electric Commissioners as provided for in Massachusetts General Laws, Chapter 164.

Local Economy

The Town continues to reflect stronger economic conditions than other communities - both within the Commonwealth and nationally. Massachusetts unemployment continues to be less than the national average, and Wellesley's rate of 2.7% compares favorably with the state's average of 3.1%.

Because of its proximity to Boston and the quality of services provided, Wellesley remains attractive to urban professionals whose wealth levels are among the highest in the Commonwealth. While the per capita household income in Massachusetts is higher than national levels, Wellesley's (\$182,353) is third highest in the Commonwealth and more than four times the State average. The relative wealth is also seen in the owner occupied median housing value, which, at \$1,126,000 is more than twice that of the state and four times that of the nation. The town is densely populated and land is increasingly valuable. Tear downs and residential improvements continue to contribute to increased permit fee revenue and taxable new growth. Although the Town is 87% residential, commercial activity is diversified and the presence of Wellesley College, Babson College, and Massachusetts Bay Community College contribute to a lower unemployment rate and greater economic stability.

The Town continues to manage its financial affairs in a prudent manner. It has maintained its “excellent” bond rating of Aaa by incorporating long range planning tools such as a Town-wide Financial Plan; maintaining reserve levels; investing in technology; maintaining facilities to avoid costly emergency repairs; continuing an aggressive pay-as-you-go financing strategy for capital improvements, and utilizing the dedicated revenue streams from debt that is exempt from the constraints of Proposition 2 ½ to finance some of its larger projects.

The Town has also enhanced its revenue flexibility by establishing enterprise funds. This has allowed the Town to shift one hundred percent of the operating cost and capital improvements to the users of electric, water, and sewer services so that no tax support goes towards providing these services. All related debt is funded through user fees. By doing so the Town is able to provide the maximum tax dollars available to all other services.

Financial Planning and Internal Controls

The Town has intentionally increased its financial reserves during the last fourteen years and the Town’s management has adopted a formal reserve policy to inform its recommendations in the annual Town-Wide Financial Plan (TWFP). Fund balance (the total of the committed, assigned, and unassigned components of fund balance) in the general fund at year end was 17.0% of the total general fund revenues. This is an improvement over the prior year ratio of 16.5%.

The Board of Selectmen (Board) is responsible for preparing the Town-Wide Financial Plan (TWFP) which includes a forecast of the Town’s sources and uses of funds for the current year (annual budget) and for the two following years. The Selectmen establish current year budget guidelines, cognizant of reserve implications, and work with the various Town boards to achieve a balanced budget. Projections are developed for the subsequent year so that the Board may determine whether or not there will be sufficient funds to meet needs or any requests for new initiatives. The TWFP also includes projected capital needs for the next five years for the various departments and information regarding the financing for these items.

The annual pension contribution to the Wellesley Contributory Retirement System, a defined benefit pension plan administered by the Wellesley Contributory Retirement Board, represents 4.7% of the Town’s annual budget. Current employees contribute up to 11% of their salaries to the system, depending upon date of hire. An independent actuary engaged by the Retirement Board biannually calculates the amount of the annual contribution the Town must make to the pension plan to ensure that the plan will be able to fully meet its obligations to retired employees. The funded status, using the market value of assets, was 75.33% as reflected in the actuarial valuation performed as of January 1, 2019, with full funding expected by 2030. The Retirement Board uses a 6.625% assumed actuarial rate of return on investment. Management continues to factor updated valuations into its TWFP projections.

Similarly, health insurance costs and the liability for postemployment health care benefits for certain retirees and their dependents (OPEB) are key considerations in the TWFP. The Town has undertaken a number of proactive steps over the last ten years to reduce current costs and amortize the unfunded OPEB liability. As of the current actuarial valuation, completed as of December 31, 2018, in accordance with GASB Statement No. 74, the funding status has improved to 57.89%. The Town currently appropriates 2.16% of its annual budget to fully fund this obligation by 2034.

We refer you to the notes to the basic financial statements for more information on the above two matters.

Once balanced, the annual budget is then presented to the Annual Town Meeting for authorization by the Selectmen, together with comments and recommendations of the Advisory Committee. The level of budgetary control is established by Town Meeting and this approval defines the level at which expenditures may not exceed appropriations. This level is typically at the individual department salary and expense level. The state of the art financial system has a number of built in controls and department managers have ready access to their budgets.

Once payment requests are reviewed and approved by department heads, the Finance Director/Town Accountant is responsible for further review - ensuring all payroll and invoices are within the budgetary control level before authorizing payment. Additional appropriations may be approved at subsequent Town Meetings. The Advisory Committee may approve a transfer (during the budget year) from a reserve fund established at Town Meeting. These controls ensure compliance with the budget approved by Town Meeting.

The Town has implemented formal policies on cash control and investment and continues to evaluate the risk of fraud and adequacy of internal controls. An active audit committee oversees the annual audit and raises any related concerns to management and the governing boards.

New Initiatives

During fiscal 2019, the Town continued to refine plans for replacing some of its elementary schools at the Hardy/Hunnewell/Upham sites, and to gather community input on the proposed projects. To date, feasibility has been conducted for the Hunnewell site and a Special Town Meeting has been called to seek Schematic Design funds in December 2019. The Massachusetts School Building Administration (MSBA) - supported project (Hardy/Upham) has just recently begun the feasibility stage. The School Building Committee will likely bring forward a proposal to construct two schools at a cost of over \$115 million in the Spring of 2021. The projects will likely be proposed for debt exclusion.

The Town continues to address a number of high density 40B housing proposals from developers, and to work with them to mitigate negative impacts upon abutters and other Town residents. A significant affordable housing proposal is being proposed under section 40R, which would construct 350 rental units at the Wellesley Office Park. All of the units would qualify toward the Town's affordable housing quota with additional positive financial impacts to the Town.

The significant and historic Town Hall Exterior Renovation is winding down, after more than a year of construction. Slate and copper roofs have been replaced, stonework has been cleaned and re-grouted, ornamentation has been re-fabricated, windows remediated and replaced, and structural problems resolved. The magnitude of the project has triggered some legal requirements under the Americans with Disabilities Act; which will be the subject of future appropriation requests and probable debt exclusion.

The Town has devoted additional resources to mental health initiatives in the latest budget cycle. It has coordinated its efforts across the organization and its various boards to maximize impact.

Environmental sustainability also continues to be a core community value, with several new grants and initiatives in this area.

Awards and Acknowledgements

The Government Finance Officers Association (GFOA) has awarded a Certificate of Achievement for Excellence in Financial Reporting to the Town of Wellesley for its Comprehensive Annual Financial Reports (CAFR) for the last fifteen years. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of a state and local government financial report.

In order to be awarded the Certificate of Achievement, a government must publish an easily readable and efficiently organized Comprehensive Annual Financial Report, whose contents conform to program standards. The report must satisfy both generally accepted accounting principles and applicable legal requirements.

We would like to express our appreciation to the Finance Department and the members of the other departments who assisted and contributed to the preparation of this report. Credit must also be given to the Board of

Selectmen for their unfailing support over many years for maintaining the highest standards of professionalism in the management of the Town's finances.

Independent Auditor's Report

To the Honorable Board of Selectmen
and the Audit Committee
Town of Wellesley, Massachusetts

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Wellesley, Massachusetts (Town), as of and for the year ended June 30, 2019 (except for the Wellesley Contributory Retirement System which is as of and for the year ended December 31, 2018), and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Wellesley, Massachusetts, as of June 30, 2019 (except for the Wellesley Contributory Retirement System which is as of December 31, 2018), and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the required supplementary information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town of Wellesley's basic financial statements. The introductory section, combining and individual fund statements, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual fund statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated November 4, 2019 on our consideration of the Town of Wellesley, Massachusetts' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Town of Wellesley's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town of Wellesley's internal control over financial reporting and compliance.

Management's Discussion and Analysis

Management's Discussion and Analysis

As management of the Town of Wellesley, Massachusetts, we offer readers of these financial statements this narrative overview and analysis of the financial activities of the Town of Wellesley for the year ended June 30, 2019. We encourage readers to consider the information presented in this report in conjunction with additional information that we have furnished in our letter of transmittal.

The Governmental Accounting Standards Board (GASB) is the authoritative standard setting body that provides guidance on how to prepare financial statements in conformity with generally accepted accounting principles (GAAP). Users of these financial statements (such as investors and rating agencies) rely on the GASB to establish consistent reporting standards for all governments in the United States. This consistent application is the only way users (including citizens, the media, legislators and others) can assess the financial condition of one government compared to others.

Governments must adhere to GASB pronouncements in order to issue their financial statements in conformity with GAAP. The users of financial statements also rely on the independent auditor's opinion. If the Town's financial statements have significant departures from GAAP, the independent auditors may issue a modified opinion or a disclaimer (where no opinion is given). These types of opinions may have an adverse effect on the Town's bond rating and its ability to borrow money at favorable interest rates. The Town has enjoyed an unmodified opinion on its financial statements for many years.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Town of Wellesley's basic financial statements. The Town's basic financial statements comprise three components: 1) government-wide financial statements 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the Town's finances, in a manner similar to private-sector businesses.

The statement of net position presents information on all of the Town's assets and deferred outflows and liabilities and deferred inflows, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating.

The statement of activities presents information showing how the Town's net position changed during the most recent year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing or the related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities include general government, facilities maintenance, natural resources, public safety, public education, public works, health, recreation, library, community preservation, traffic and parking management, and interest. The business-type activities include the activities of the sewer, water, and electric light enterprise funds.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Town, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Town can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund statements focus on near-term inflows and outflows of expendable resources, as well as on balances of expendable resources available at the end of the year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The Town currently has three major governmental funds that are presented separately in the governmental fund financial statements. The remaining nonmajor funds are combined into a single, aggregated presentation. Individual fund data for each of these nonmajor governmental funds is provided in the form of combining statements elsewhere in this report.

The Town adopts an annual appropriated budget for its general fund. A budgetary comparison schedule has been provided for the general fund to demonstrate compliance with this budget.

Proprietary funds. The Town maintains two types of proprietary funds.

Enterprise funds are used to report the same functions as business-type activities in the government-wide financial statements. The Town uses enterprise funds to account for its sewer, water, and electric operations. Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for sewer, water, and electric operations, all of which are considered major funds of the Town.

Internal service funds are an accounting device used to accumulate and allocate costs internally among various functions. The Town maintains an internal service fund to account for health insurance, self-insured worker's compensation, unemployment, and fleet maintenance.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statement because the resources of those funds are not available to support the Town's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

Notes to financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Financial Highlights

- The Town's government-wide assets and deferred outflows of resources exceeded its liabilities and deferred inflows of resources at the close of the recent year by \$114.9 million and \$97.5 million for governmental activities and business-type activities, respectively. The business-type activities include the activities of the sewer, water, and electric enterprise funds.
- At the close of the current year, the Town of Wellesley's general fund reported an ending fund balance of \$31.1 million, an increase of \$1.8 million over the prior year. Total fund balance represents 17% of total general fund expenditures, which management considers adequate and within expectations as compared to the Town's Financial Reserve Policy. Of this amount, \$24.2 million or 13% of general fund expenditures is unassigned and available for appropriation at the Town's discretion. The remaining portions of the general fund balance, \$6.9 million, are committed and assigned to fund special articles, carryover encumbrances, and the 2020 budget.
- The Town of Wellesley's total governmental long-term debt decreased by approximately \$7.7 million during the current year as a result of new issuances of \$4.5 million, inclusive of a \$298,000 premium, and scheduled principal payments of \$12.3 million.

Government-wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. The Town of Wellesley's assets and deferred outflows of resources exceeded its liabilities and deferred inflows of resources by \$212.3 million at the close of 2019.

Government-wide net position of \$250.7 million reflects its net investment in capital assets (e.g., land, buildings, machinery, and equipment); less any related debt used to acquire those assets that is still outstanding. The Town uses these capital assets to provide services to citizens; consequently, these assets are *not* available for future spending. Although the investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the Town's net position, \$12.9 million, represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position had a year-end deficit balance of \$51.3 million.

Details related to the Town's governmental and business-type activities follow.

Governmental activities. The governmental activities net position increased by \$3.1 million during the current year compared to an increase of \$6.9 million in the prior year. Total revenues increased by \$7.6 million, while total expenses increased by \$11.4 million. This was in line with management's expectations.

Governmental capital assets decreased by \$3.7 million due to \$10.5 million of current year additions, offset by depreciation expense of \$14.2 million. Current year capital additions included improvements to the façade of Town Hall, roadway infrastructure work, as well as the purchase of a number of new vehicles.

Noncurrent liabilities, excluding debt, consist mainly of the \$51.9 million net pension liability and the \$51.6 million net OPEB liability.

Revenues

Wellesley's revenues are primarily dependent upon the income of Town residents and their willingness and ability to pay, rather than relying on external sources such as State grants. These revenues include property taxes, including those taxes derived from voter-authorized debt exclusions, Community Preservation tax surcharges, and local receipts from vehicle excise taxes and building permits. The amount of debt exclusions is notable in that it is a dedicated revenue stream for capital projects voluntarily added to the assessments by voter referendum. Because of the affluence of Wellesley's citizens, the Town is able to afford to maintain its services, assets, reserves and provide many extra services that improve the life of its citizens. **Associated Risks:** Income and wealth levels directly impact the Town's revenues and these factors have remained strong through various economies because of the Town's educational reputation and its proximity to Boston. These revenues account for approximately 60 percent of the revenue increase from 2018 to 2019.

Other financial notes related to governmental activities

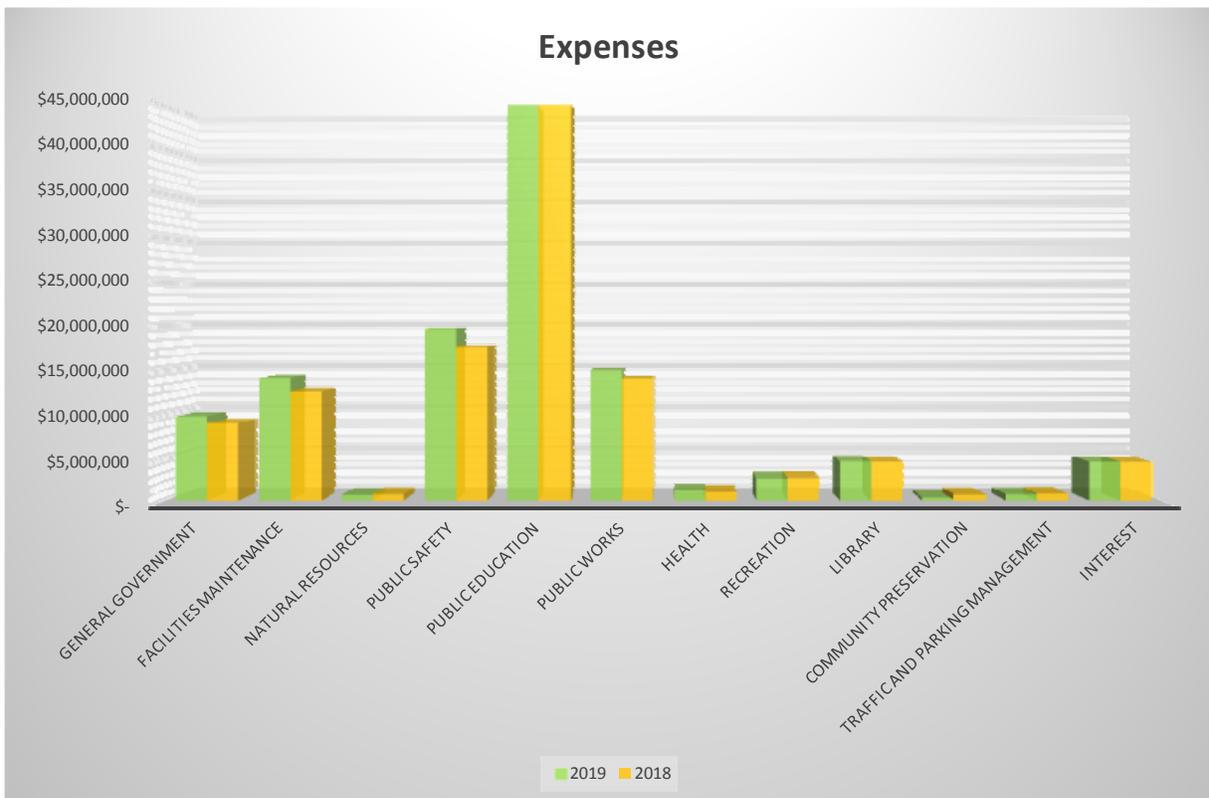

In addition to the 69% of total revenues that property taxes provide, the following is a brief description of our other revenue sources.

- Operating grants and contributions accounted for 17% percent of total governmental revenues. Most of these resources apply to educational operations. These resources offset costs within the school department and supplement their general fund operating budget. This category increased by \$1.3 million over the prior year primarily due to increases in State aid.
- Charges for services represented 7% of total governmental revenues. The Town can exercise more control over this category of revenue than any other. Fees charged for services rendered that are set by the Town are included in this category. This category decreased by roughly \$515,000 over the prior year.
- Capital grants and contributions represent 1% of total governmental revenues. These are comprised of the state match for the community preservation program and the state’s chapter 90 roadway funds.
- Other taxes and other revenues also comprised a total of 6% percent of the governmental revenues. These primarily include capital grants, motor vehicle and other excise taxes, non-restricted grants and contributions, and investment earnings.

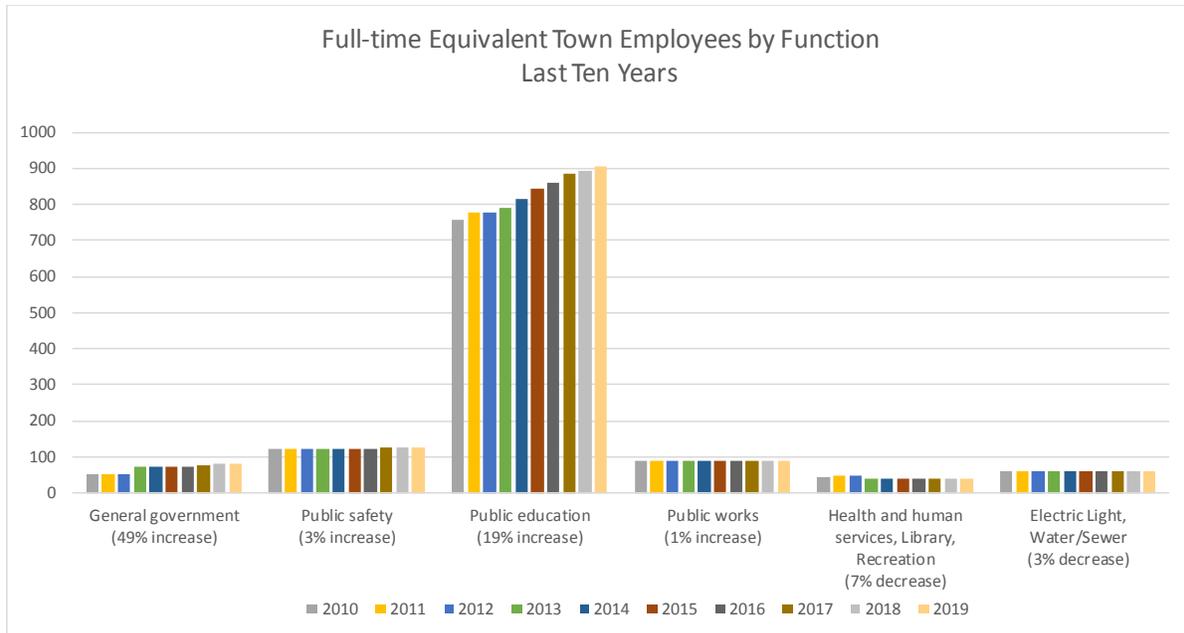

Expenses

The Town’s highest priority is the quality of education provided to its students.

- Education is by far the largest governmental activity of the Town, comprising 64% of the Town’s total expenses. Approximately \$90.8 million in general revenues were needed to cover its 2019 operating expenses, net of related program revenues.
- Educational expense includes a pension contribution of approximately \$17.7 million (\$17.4 million in the prior year) made by the state on-behalf of Wellesley teachers. Operating grants and educational expenses are grossed-up by recording this contribution.
- Public safety and Public works are the second and third largest activities of the Town. Approximately \$13.4 million and \$12.9 million, respectively, of general revenues were needed to cover their 2019 operating expenses, net of related program revenues.

As previously mentioned, most of the excluded debt relates to the construction and improvement of Schools, and the Town’s capital plans for the foreseeable future continue this focus. The Town has also made significant progress in funding its pension and OPEB liabilities and funding schedules are in line with revenue growth so as not to put strain on other operating budgets. **Associated Risks:** An economic downturn might affect the community less significantly than other communities within the Commonwealth because the capital assets and reserves are being well maintained and expenditures could be deferred in the short-term. Increased energy costs might have a negative impact, but the Town continues to explore sustainable alternatives. Employee costs continue to increase as School programs expand and health care costs increase. The Town needs to continue to evaluate the efficient delivery of services. The Town’s form of government is highly decentralized and this makes compromise necessary to achieve agreement on how resources can most effectively be deployed. This structure would make it challenging if reductions were necessary.

Business-type activities. Business-type activities decreased the Town’s net position by \$1.5 million compared to a decrease of \$2.3 million during the previous year. The results of all three enterprise funds were consistent with management’s expectations.

As shown below, business-type activities assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by \$97.5 million at the close of 2019. Net investment in capital assets was \$88.6 million (91%), net position is restricted for depreciation in the amount of \$1.0 million (1%), and unrestricted net position was \$7.9 million (8%). The Electric Light fund experienced a \$2.3 million decrease in net position while the water and sewer enterprise funds net position each increased by \$493,000 and \$311,000, respectively. These results continue to reflect management’s goal of maintaining the systems while only charging users for the cost of operations, which included depreciation of \$5.1 million in 2019.

Financial Analysis of the Town's Major Funds

As noted earlier, the Town uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the Town's governmental funds is to provide information on near-term inflows, outflows, and balances of expendable resources. Such information is useful in assessing the Town's financing requirements. In particular, the unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the year.

As of the end of the current year, governmental funds reported combined ending fund balances of \$60.4 million. Total fund balances increased \$4.1 million from the prior year mainly due to positive budgetary results in the general fund, and the permanent financing of prior year capital project expenditures.

General Fund

The General Fund is the chief operating fund of the Town. At the end of the current year, the unassigned fund balance of the general fund totaled \$24.2 million, while the total fund balance was \$31.1 million. As a measure of the general fund's liquidity, it may be useful to compare both the unassigned fund balance and the total fund balance to total fund expenditures. The unassigned fund balance represents 14% of total general fund expenditures, while the total fund balance represents 17% of that same amount.

Fund balance of the General Fund increased \$1.8 million over the prior year as a result of better than expected revenue collections and from appropriation turnbacks in virtually all expenditure categories.

Highway Chapter 90 Major Fund

This fund is a special revenue fund that accounts for activities associated with on-going road and sidewalk projects that are funded with grants from the Commonwealth of Massachusetts. At June 30, 2019, the fund has a receivable due from the Commonwealth in the amount of \$2.1 million; however, the associated revenue is not available but will be recognized and realized by the Town as future grant reimbursement requests are submitted

to the granting agency. Fund expenditures and transfers out were 100% offset by grant revenues. The ending fund balance was zero.

Capital Projects Major Fund

This fund is used to account for resources that are restricted to expenditures for capital outlays, including the acquisition or construction of capital facilities and other capital assets of the governmental funds. During the year the fund incurred expenditures for various general government, public works, and library projects. Additionally, \$4.2 million of bond proceeds were received to permanently finance capital expenditures incurred in the current and prior year. At June 30, 2019, the ending fund balance was \$10.1 million, an increase of \$1.1 million over the prior year. These funds will be used for future capital outlays.

Proprietary funds. The Town's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail. Factors concerning the finances of these funds have already been addressed in the discussion of the Town's business-type activities.

General Fund Budgetary Highlights

The original 2019 budget consisted of approximately \$175.2 million in appropriations and other amounts to be raised. Included in the original budget are approximately \$9.9 million in amounts carried over from previous years. During 2019, the Town approved approximately \$2.8 million of supplemental appropriations primarily for snow and ice costs, and capital improvement costs. These supplemental appropriations were financed through the use of free cash.

Revenues of the general fund were \$4.5 million higher than budget expectations and this is mainly due to higher than expected building permit and investment income revenues. Total expenditures and carryovers were less than budget by approximately \$3.5 million (2%) because of turn backs in a number of appropriation line items.

Capital Assets and Debt Management

In conjunction with the operating budget, the Town annually prepares a capital budget which includes detailed information concerning those capital requests for the upcoming year as well as summary information for the following four years to identify current projections of what level of capital outlay will be required in future years.

As part of the capital plan, the Town has historically financed the acquisition of a portion of its capital assets from current revenue. As noted earlier, this policy will continue to improve the financial position as net position will increase by the amount of acquisitions less the current depreciation.

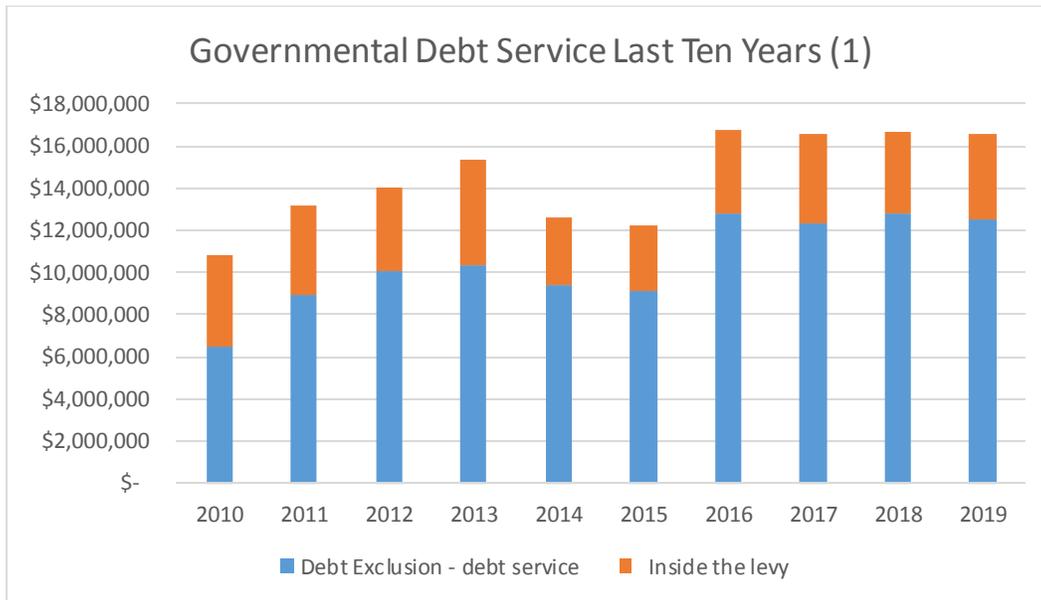

Major capital assets are funded by the issuance of long-term debt. During the fiscal year, the Town incurred \$10.5 million of capitalized governmental expenditures and recognized depreciation expense of \$14.2 million. Current year additions consist mainly of improvements to the façade of Town Hall, roadway improvements, and the purchase of vehicles for a number of departments.

Outstanding long-term debt of the general government, as of June 30, 2019, totaled \$130.6 million. During 2019 the Town issued \$4.5 million of long-term debt in the form of bond proceeds and a related premium. This issuance financed expenditures for the Hunnewell and Middle School feasibility studies, Middle School building improvements, as well as several other capital projects.

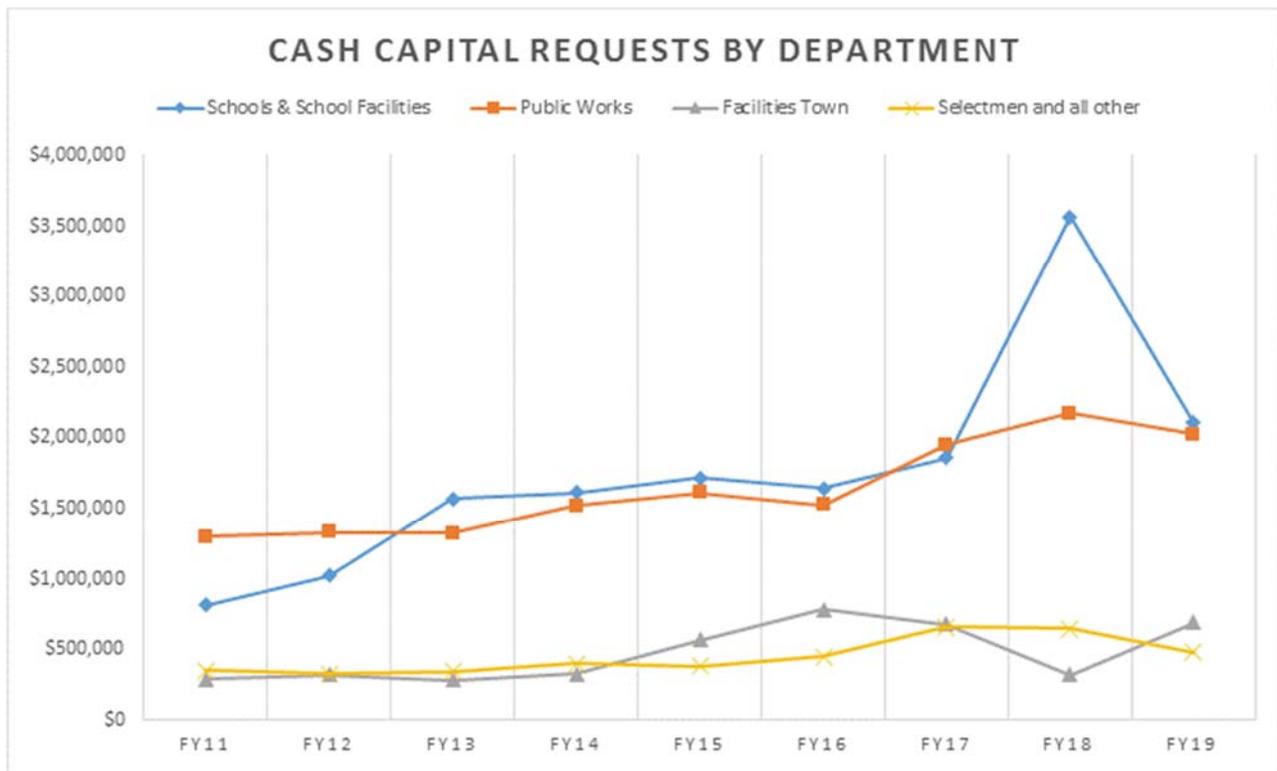

The business-type activities have \$3.2 million in water enterprise debt and \$1.9 million in sewer enterprise debt that is fully supported by the rates. The funds do not rely on a general fund subsidy. Capital assets, net of accumulated depreciation increased by \$355,000 over the prior year. Current year business-type activities

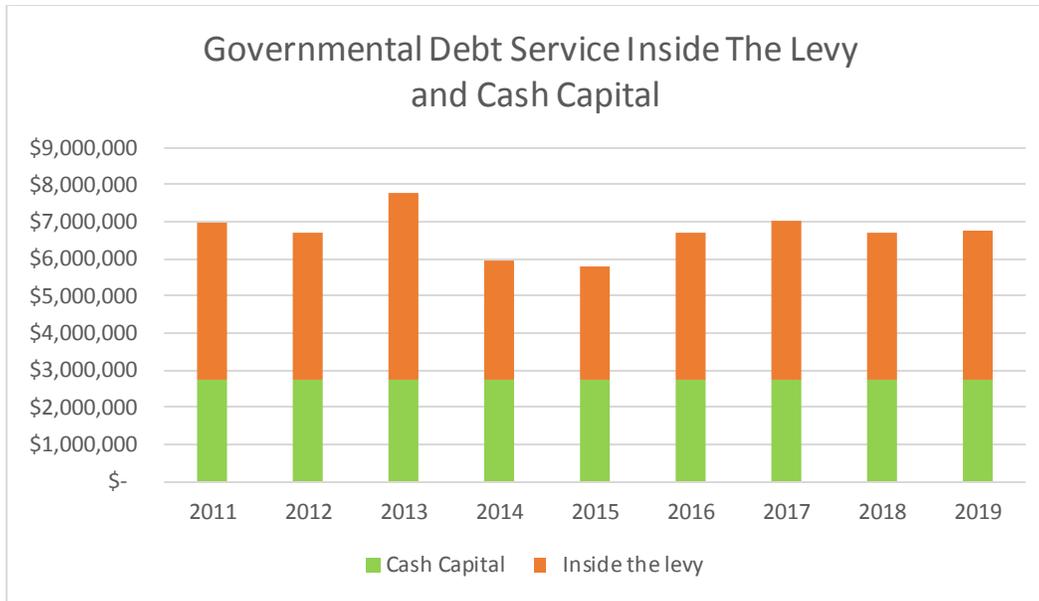

additions totaled \$5.5 million and were primarily for distribution plant improvements. Depreciation expense was \$5.1 million.

The following charts depict the debt service requirements for excluded and non-excluded debt over the last 10 years, along with cash requests by major department, and the total cash spending trend from FY2011 to the present.

(1) Governmental debt only; does not include self-supporting Enterprise Fund debt.

The Town has continued to invest its own funds and to borrow inside the levy to finance capital projects in addition projects financed through debt exclusions.

Please refer to notes 4, 6, and 8 to the financial statements for further discussion of the major capital and debt activity.

Pension Trust Fund

The Pension Trust Fund (System) recognized a net investment loss of \$4.5 million for the calendar year ended December 31, 2018. This loss was consistent with the economic trends experienced during the 4th quarter of calendar year 2018. The System paid out \$12.9 million of retirement benefits, administration costs and transfers to other systems. Total net position of the System amounted to \$187.9 million at December 31, 2018. Based on the most recent actuarial valuation performed as of January 1, 2019, the System’s Funded Ratio was 75.33%, an increase from the previous valuation (73.33%) dated January 1, 2017, because changes in liabilities related to increasing the COLA base offset investment gains.

Other Postemployment Benefits

As of June 30, 2019 the Town has recognized a net other postemployment benefits (OPEB) liability in the amount of \$52.1 million in accordance with the provisions of GASB Statement No.75. During 2019 the Town transferred \$3.6 million of pre-funding contributions to the OPEB Trust fund. The assets set aside in trust for future benefits amounted to \$70.0 million at year end. As of June 30, 2019, the ratio of the Plan’s Fiduciary Net Position to the Total OPEB Liability (funded ratio) is 57.89%.

Requests for Information

This financial report is designed to provide a general overview of the Town’s finances. Questions concerning any of the information provided in this report or requests for additional information should be addressed to the Finance Director, 525 Washington Street, Wellesley, MA 02482.

**RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS
TO THE STATEMENT OF ACTIVITIES**

YEAR ENDED JUNE 30, 2019

Net change in fund balances - total governmental funds.....	\$	4,091,075
<p>Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.</p>		
Capital outlay.....		10,480,193
Depreciation expense.....		<u>(14,211,327)</u>
Net effect of reporting capital assets.....		(3,731,134)
<p>Revenues in the Statement of Activities that do not provide current financial resources are unavailable in the Statement of Revenues, Expenditures and Changes in Fund Balances. Therefore, the recognition of revenue for various types of accounts receivable differ between the two statements. This amount represents the net change in unavailable revenue.....</p>		
		(581,976)
<p>The issuance of long-term debt provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the financial resources of governmental funds. Neither transaction has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are unavailable and amortized in the Statement of Activities.</p>		
Issuance of bonds.....		(4,245,000)
Premium from issuance of bonds.....		(298,376)
Net amortization of premium from issuance of bonds.....		636,510
Net change in deferred charge on refunding.....		(70,704)
Debt service principal payments.....		<u>11,643,000</u>
Net effect of reporting long-term debt.....		7,665,430
<p>Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds.</p>		
Net change in compensated absences accrual.....		11,673
Net change in accrued interest on long-term debt.....		40,187
Net change in deferred outflow/(inflow) of resources related to pensions.....		14,672,033
Net change in net pension liability.....		(14,594,956)
Net change in deferred outflow/(inflow) of resources related to other postemployment benefits.....		(14,756,008)
Net change in net other postemployment benefits liability.....		<u>10,351,900</u>
Net effect of recording long-term liabilities.....		(4,275,171)
The net activity of internal service funds is reported with Governmental Activities.....		<u>(60,393)</u>
Change in net position of governmental activities.....	\$	<u><u>3,107,831</u></u>

See notes to basic financial statements.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying basic financial statements of the Town of Wellesley, Massachusetts (the Town) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The Governmental Accounting Standards Board (GASB) is the recognized standard-setting body for establishing governmental accounting and financial reporting principles. The significant accounting policies are described herein.

A. Reporting Entity

The Town was incorporated in 1881 under the statutes of the Commonwealth of Massachusetts (the "Commonwealth"). The Town is a municipal corporation governed by an elected Board of Selectmen.

For financial reporting purposes, the Town has included all funds, organizations, agencies, boards, commissions and institutions. The Town has also considered all potential component units for which it is financially accountable as well as other organizations for which the nature and significance of their relationship with the Town are such that exclusion would cause the basic financial statements to be misleading or incomplete. As required by GAAP, these basic financial statements present the Town (the primary government) and its component units. One entity has been included as a component unit in the reporting entity, because of the significance of its operational and financial relationships.

Component Unit Presented as a Fiduciary Fund – The following component unit is presented as a Fiduciary Fund of the primary government due to the nature and significance of the relationship between the Town and the component unit.

In the Fiduciary Funds:

The Wellesley Contributory Retirement System (the System) is a multiple-employer, cost-sharing, contributory defined benefit pension plan covering all employees of the governmental member units deemed eligible by the System's Board of Trustees (the Board), with the exception of school department employees who serve in a teaching capacity. The pensions of such school employees are administered by the Commonwealth of Massachusetts' Teachers Retirement System. Membership in the System is mandatory immediately upon the commencement of employment for all permanent employees working a minimum of 20 hours per week. The System has 2 participating employers; the Town of Wellesley and the Wellesley Housing Authority.

The System is governed by a five-member board comprised of the Finance Director (ex officio), two members elected by System's participants, one member appointed by the Board of Selectmen of the Town and a member appointed by the Board members.

The System is presented using the accrual basis of accounting and is reported as a pension trust fund in the fiduciary fund financial statements.

Availability of Financial Information for Component Units

The System issues a publicly available audited financial report in accordance with guidelines established by the Commonwealth of Massachusetts' (Commonwealth) Public Employee Retirement Administration Commission (PERAC). That report may be obtained by contacting the System located at 525 Washington Street, Wellesley, MA 02482.

B. Government-Wide and Fund-Level Financial Statements

Government-Wide Financial Statements

The government-wide financial statements (i.e., statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units.

Governmental activities, which are primarily supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which are supported primarily by user fees and charges.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements. Nonmajor funds are aggregated and displayed in a single column.

Major Fund Criteria

Major funds must be reported if the following criteria are met:

- If the total assets and deferred outflows of resources, liabilities and deferred inflows of resources, revenues, or expenditures/expenses of an individual governmental or enterprise fund are at least 10 percent of the corresponding element (assets and deferred outflows of resources, liabilities and deferred inflows of resources, etc.) for all funds of that category or type (total governmental or total enterprise funds), *and*
- If the total assets and deferred outflows of resources, liabilities and deferred inflows of resources, revenues, or expenditures/expenses of the individual governmental fund or enterprise fund are at least 5 percent of the corresponding element for all governmental and enterprise funds combined.

Additionally, any other governmental or enterprise fund that management believes is particularly significant to the basic financial statements may be reported as a major fund.

Internal service funds and fiduciary funds are reported by fund type.

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

Government-Wide Financial Statements

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded when the liabilities are incurred. Real estate and personal property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The statement of activities demonstrates the degree to which the direct expenses of a particular function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include the following:

- Charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment.
- Grants and contributions that are restricted to meeting the operational requirements of a particular function or segment.
- Grants and contributions that are restricted to meeting the capital requirements of a particular function or segment.
- Taxes and other items not identifiable as program revenues are reported as general revenues.

For the most part, the effect of interfund activity has been removed from the government-wide financial statements. However, the effect of interfund services provided and used between functions is not eliminated as the elimination of these charges would distort the direct costs and program revenues reported for the functions affected.

Fund Financial Statements

Governmental fund financial statements are reported using the flow of current financial resources measurement focus and the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., when measurable and available). Measurable means the amount of the transaction can be determined and available means collectible within the current period or soon enough thereafter to pay liabilities of the current period. Expenditures are recorded when the related fund liability is incurred, except for unmatured interest on general long-term debt which is recognized when due, and certain compensated absences, claims and judgments which are recognized when the amounts have matured or are due and payable.

Real estate and personal property tax revenues are considered available if they are collected within 60 days after year-end. Investment income is susceptible to accrual. Other receipts and tax revenues become measurable and available when the cash is received and are recognized as revenue at that time.

Entitlements and shared revenues are recorded at the time of receipt or earlier if the “susceptible to accrual criteria” is met. Expenditure driven grants recognize revenue when the qualifying expenditures are incurred and all other grant requirements are met.

The following major governmental funds are reported:

The *general fund* is the primary operating fund. It is used to account for all financial resources, except those that are required to be accounted for in another fund.

The *highway chapter 90 fund* is used to account for activities associated with on-going road and sidewalk projects that are funded with grants from the Commonwealth.

The *capital projects fund* is used to account for resources that are restricted, committed, or assigned to expenditures for capital outlays, including the acquisition or construction of capital facilities and other capital assets of the governmental funds.

The nonmajor governmental funds consist of other special revenue and permanent funds that are aggregated and presented in the *nonmajor governmental funds* column on the governmental funds financial statements. The following describes the general use of these fund types:

The *special revenue fund* is used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditures for specified purposes other than permanent funds or major capital projects. The special revenue funds are reported in the nonmajor funds column of the governmental fund financial statements.

The *permanent fund* is used to account for and report financial resources that are legally restricted to the extent that only earnings, not principal, may be used for purposes that support the governmental programs. The permanent funds are also reported in the nonmajor funds column of the governmental funds financial statements.

Proprietary fund financial statements are reported using the flow of economic resources measurement focus and use the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded when the liabilities are incurred.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the proprietary funds principal ongoing operations. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The following major proprietary funds are reported:

The *sewer fund* is used to account for sewage treatment operations of the department of public works that are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges.

The *water fund* is used to account for water distribution operations of the department of public works that are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges.

The *electric light fund* is used to account for operations of the municipal light department that are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges.

Additionally, the following proprietary fund type is reported:

The *internal service fund* is used to account for the financing of goods or services provided by one department to other departments of the town on a cost-reimbursement basis. The Town's internal service fund is used to account for the financing of medical claims of all covered town employees and their covered dependents, the financing of the self-insured workers' compensation plan, unemployment benefits, and fleet maintenance.

Fiduciary fund financial statements are reported using the flow of economic resources measurement focus and use the accrual basis of accounting. Fiduciary funds are used to account for assets held in a trustee capacity for others that cannot be used to support the governmental programs.

The following fiduciary fund types are reported:

The *pension and other employee benefit trust fund* is used to account for the activities of the System, which accumulates resources to provide pension benefits to eligible retirees and their beneficiaries and of the *other postemployment benefit trust fund* which accumulates resources to provide funding for future OPEB (other postemployment benefits) liabilities.

The *private-purpose trust fund* is used to account for trust arrangements that exclusively benefit individuals, private organizations, or other governments. Some of these trust funds have donor restrictions and trustee policies that do not allow the endowment portion to be spent. The restrictions and trustee policies only allow the trustees to approve spending of the realized investment earnings. The Town's educational scholarships are accounted for in this fund.

The *agency fund* is used to account for payroll withholding and other assets held in a purely custodial capacity. Agency funds apply the accrual basis of accounting but do not have a measurement focus.

D. Cash and Investments

Government-Wide and Fund Financial Statements

The Town's cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with an original maturity of three months or less from the date of acquisition.

Investments are carried at fair value. The fair values were determined by the closing price for those securities traded on national stock exchanges and at the average bid-and-asked quotation for those securities traded in the over-the-counter market.

E. Fair Value Measurements

The Town reports required types of financial instruments in accordance with the fair value standards. These standards require an entity to maximize the use of observable inputs (such as quoted prices in active markets) and minimize the use of unobservable inputs (such as appraisals or valuation techniques) to determine fair value. Fair value standards also require the government to classify these financial instruments into a three-level hierarchy, based on the priority of inputs to the valuation technique or in accordance with net asset value practical expedient rules, which allow for either Level 2 or Level 3 depending on lock up and notice periods associated with the underlying funds.

Instruments measured and reported at fair value are classified and disclosed in one of the following categories:

Level 1 – Quoted prices are available in active markets for identical instruments as of the reporting date. Instruments, which are generally included in this category, include actively traded equity and debt securities, U.S. government obligations, and mutual funds with quoted market prices in active markets.

Level 2 – Pricing inputs are other than quoted in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Certain fixed income securities, primarily corporate bonds, are classified as Level 2 because fair values are estimated using pricing models, matrix pricing, or discounted cash flows.

Level 3 – Pricing inputs are unobservable for the instrument and include situations where there is little, if any, market activity for the instrument. The inputs into the determination of fair value require significant management judgment or estimation.

In some instances the inputs used to measure fair value may fall into different levels of the fair value hierarchy and is based on the lowest level of input that is significant to the fair value measurement.

Market price is affected by a number of factors, including the type of instrument and the characteristics specific to the instrument. Instruments with readily available active quoted prices generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value. It is reasonably possible that change in values of these instruments will occur in the near term and that such changes could materially

affect amounts reported in these financial statements. For more information on the fair value of the Town's financial instruments please see Note 2- Cash and Investments.

F. Accounts Receivable

Government-Wide and Fund Financial Statements

The recognition of revenue related to accounts receivable reported in the government-wide financial statements and the proprietary funds and fiduciary funds financial statements are reported under the accrual basis of accounting. The recognition of revenue related to accounts receivable reported in the governmental funds financial statements are reported under the modified accrual basis of accounting.

Real Estate, Personal Property Taxes and Tax Liens

Real estate and personal property taxes are levied and based on values assessed on January 1st of every year. Assessed values are established by the Board of Assessor's for 100% of the estimated fair market value. Taxes are due on August 1st, November 1st, February 1st and May 1st and are subject to penalties and interest if they are not paid by the respective due date. Real estate and personal property taxes levied are recorded as receivables in the year of the levy.

Real estate tax liens are processed six months after the close of the valuation year on delinquent properties and are recorded as receivables in the year they are processed.

Real estate receivables are secured via the tax lien process and are considered 100% collectible. Accordingly, an allowance for uncollectibles is not reported.

Personal property taxes cannot be secured through the lien process. The allowance of uncollectibles is estimated based on historical trends and specific account analysis.

Motor Vehicle Excise

Motor vehicle excise taxes are assessed annually for each vehicle registered and are recorded as receivables in the year of the levy. The Commonwealth is responsible for reporting the number of vehicles registered and the fair values of those vehicles. The tax calculation is the fair value of the vehicle multiplied by \$25 per \$1,000 of value.

The allowance for uncollectibles is estimated based on historical trends and specific account analysis.

User Charges

User fees are levied monthly based on individual meter readings and are subject to penalties and interest if they are not paid by the respective due date. Liens are processed in December of every year and included as a lien on the property owner's tax bill.

Since the receivables are secured via the lien process, these accounts are considered 100% collectible and therefore do not report an allowance for uncollectibles.

Departmental and Other

Departmental and other receivables are recorded net of an allowance for uncollectible accounts. The allowance of uncollectibles is estimated based on historical trends and specific account analysis.

Intergovernmental

Various federal and state grants for operating and capital purposes are applied for and received annually. For non-expenditure driven grants, receivables are recorded as soon as all eligibility requirements imposed by the provider have been met. For expenditure driven grants, receivables are recorded when the qualifying expenditures are incurred and all other grant requirements are met.

These receivables are considered 100% collectible and therefore do not report an allowance for uncollectibles.

Community Preservation Surcharge

The Town has adopted the State Community Preservation Act and the provisions of this Act allow the Town to assess property owners an additional 1% to 3% of the total real estate commitment. The Town has voted for an additional surcharge of 1% with the first \$100,000 of valuation for each parcel being exempt. Revenues from this surcharge are credited to the Community Preservation Fund, a component of the nonmajor governmental funds, to fund open space acquisitions, affordable housing initiatives, historic preservation, and recreational uses.

G. Inventories***Government-Wide and Fund Financial Statements***

Inventories are recorded as expenditures at the time of purchase. Such inventories are not material in total to the government-wide and fund financial statements, and therefore are not reported.

Materials and supplies held by the Enterprise Funds are generally recorded at original cost, using the weighted average method.

H. Capital Assets***Government-Wide and Proprietary Fund Financial Statements***

Capital assets include land, land improvements, buildings, machinery and equipment, and public domain infrastructure (e.g., roads, street lights, sewer mains, and similar items), which are reported in the applicable governmental or business-type activity column of the government-wide financial statements. Capital assets are recorded at historical cost or at estimated historical cost if actual historical cost is not available. Donated capital assets (including works of art) and assets acquired under a service concession agreement are recorded at acquisition value. Except for the capital assets of the governmental activities column in the government-wide financial statements, construction period interest is capitalized on constructed capital assets.

For the Town of Wellesley, capital assets are defined as buildings and infrastructure with a cost greater than \$100,000, improvements other than buildings with a cost greater than \$50,000, and equipment with a cost greater than \$25,000 and an estimated useful life of greater than three years. The Town has elected not to consider books and other materials purchased for the library as capital assets.

Capital assets (excluding land and construction-in-progress) are depreciated over the estimated useful lives using the straight-line method. The estimated useful lives of capital assets being depreciated are as follows:

Capital Asset Type	Estimated Useful Life (in years)
Public domain infrastructure.....	50
Buildings.....	10-40
Improvements other than buildings.....	20-30
Equipment.....	3-21

The cost of normal maintenance and repairs that do not add to the value of the assets or materially extend asset lives are not capitalized and are treated as expenses when incurred. Improvements are capitalized.

Governmental Fund Financial Statements

Capital asset costs are recorded as expenditures in the acquiring fund in the year of the purchase.

I. Deferred Outflows/Inflows of Resources

Government-Wide Financial Statements (Net Position)

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/ expenditure) until then. The Town has reported deferred outflows of resources related to pensions, other postemployment benefits and debt refundings in this category.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Town has recorded deferred inflows of resources relating to taxes paid in advance, pensions and other postemployment benefits in this category.

Governmental Fund Financial Statements

In addition to liabilities, the governmental funds balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents assets that have been recorded in the governmental fund financial statements but the revenue is not available and so will not be recognized as an inflow of resources (revenue) until it becomes available. The Town has recorded unavailable revenue and advanced tax collections as deferred inflows of resources in the governmental funds balance sheet.

J. Interfund Receivables and Payables

During the course of its operations, transactions occur between and within individual funds that may result in amounts owed between funds.

Government-Wide Financial Statements

Transactions of a buyer/seller nature between and within governmental funds and internal service funds are eliminated from the governmental activities in the statement of net position. Any residual balances outstanding between the governmental activities and business-type activities are reported in the Statement of Net Position as "internal balances".

Fund Financial Statements

Transactions of a buyer/seller nature between and within funds are *not* eliminated from the individual fund statements. Receivables and payables resulting from these transactions are classified as "Advances from/to other funds" on the balance sheet.

K. Interfund Transfers

During the course of its operations, resources are permanently reallocated between and within funds. These transactions are reported as transfers in and transfers out.

Government-Wide Financial Statements

Transfers between and within governmental funds and internal service funds are eliminated from the governmental activities in the statement of net position. Any residual balances outstanding between the governmental activities and business-type activities are reported in the statement of activities as "Transfers, net".

Fund Financial Statements

Transfers between and within funds are *not* eliminated from the individual fund statements and are reported as transfers in and transfers out.

L. Unavailable Revenue

Unavailable revenue at the governmental fund financial statement level represents billed receivables that do not meet the available criterion in accordance with the current financial resources measurement focus and the modified accrual basis of accounting, i.e. receivables that are not considered to be available to liquidate liabilities of the current period. Unavailable revenue is recognized as revenue in the conversion to the government-wide (full accrual) financial statements.

M. Net Position and Fund Equity*Government-Wide Financial Statements (Net position)*

Net position reported as "net investment in capital assets" includes capital assets, net of accumulated depreciation, less the principal balance of outstanding debt used to acquire capital assets. Unspent proceeds of capital related debt are not considered to be capital assets. Outstanding debt related to future reimbursements from the state's school building program is not considered to be capital related debt.

Net position is reported as restricted when amounts are not available for appropriation or are legally restricted by outside parties for a specific future use.

Net position has been “restricted for” the following:

“Depreciation” - represents amounts restricted in the Electric department for the statutory reserve for funded depreciation.

“Permanent funds - expendable” represents the amount of realized and unrealized investment earnings of donor restricted trusts. The restrictions and trustee policies only allows the trustees to approve spending of the realized investment earnings.

“Permanent funds - nonexpendable” represents the endowment portion of donor restricted trusts.

“Grants and gifts” represents amounts held for school, library, and other grants and gift funds.

“Community preservation” represents amounts held for uses restricted by law for community preservation purposes.

Sometimes the Town will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Town’s policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

Fund Financial Statements (Fund Balances)

Governmental fund balances are classified as nonspendable, restricted, committed, assigned, or unassigned based on the extent to which the government is bound to honor constraints on the specific purposes for which amounts in those funds can be spent.

The governmental fund balance classifications are as follows:

“Nonspendable” fund balance includes amounts that cannot be spent because they are either not in spendable form or they are legally or contractually required to be maintained intact.

“Restricted” fund balance includes amounts subject to constraints placed on the use of resources that are either externally imposed by creditors, grantors, contributors, or laws or regulations of other governments or that are imposed by law through constitutional provisions or enabling legislation.

“Committed” fund balance includes amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the government’s highest level of decision-making authority. Town Meeting is the highest level of decision making authority that can, by adoption of a Town Meeting warrant article, commit funds for a specific purpose. Once voted, the limitation imposed by the vote remains in place until the funds are used for their intended purpose or a vote is taken to rescind the commitment.

“Assigned” fund balance includes amounts that are constrained by the Town’s intent to be used for specific purposes, but are neither restricted nor committed. The Town’s by-laws authorize the Town Accountant to assign fund balance. Assignments generally only exist temporarily. Additional action does not have to be taken for the removal of an assignment.

“Unassigned” fund balance includes the residual classification for the general fund. This classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the general fund. The general fund is the only fund that reports unassigned fund balance.

The Town will, from time to time, fund outlays for a particular purpose from different components of fund balance. In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balances in the governmental fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. When different components of fund balance can be used for the same purpose, it is the Town's policy to consider restricted fund balance to have been depleted first, followed by committed fund balance, and assigned fund balance. Unassigned fund balance is applied last.

N. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of both the Wellesley Contributory Retirement System and the Massachusetts Teachers Retirement System and additions to/deductions from the System's fiduciary net position have been determined on the same basis as they are reported by the Systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

O. Long-term Debt

Government-Wide and Proprietary Fund Financial Statements

Long-term debt is reported as liabilities in the government-wide and proprietary fund statement of net position. Material bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount.

Governmental Fund Financial Statements

The face amount of governmental funds long-term debt is reported as other financing sources. Bond premiums and discounts, as well as issuance costs, are recognized in the current period. Bond premiums are reported as other financing sources and bond discounts are reported as other financing uses. Issuance costs, whether or not withheld from the actual bond proceeds received, are reported as general government expenditures.

P. Compensated Absences

Employees are granted vacation and sick leave in varying amounts based on collective bargaining agreements, state laws and personnel policies.

Government-Wide and Proprietary Fund Financial Statements

Vested or accumulated vacation and sick leave are reported as liabilities and expensed as incurred.

Governmental Fund Financial Statements

Compensated absences are reported in the governmental funds only if they have matured, i.e. unused reimbursable leave still outstanding following an employee's resignation or retirement. Vested or accumulated vacation and sick leave, which will be liquidated with expendable available financial resources, are reported as expenditures and fund liabilities upon maturity of the liability.

Q. Investment Income

Excluding the permanent funds, investment income derived from major and nonmajor governmental funds is legally assigned to the general fund unless otherwise directed by Massachusetts General Law (MGL).

Investment income from proprietary funds is voluntarily assigned and transferred to the general fund.

R. Use of Estimates

Government-Wide and Fund Financial Statements

The preparation of basic financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure for contingent assets and liabilities at the date of the basic financial statements and the reported amounts of the revenues and expenditures/expenses during the year. Actual results could vary from estimates that were used.

S. Total Column

Government-Wide Financial Statements

The total column presented on the government-wide financial statements represents consolidated financial information.

Fund Financial Statements

The total column on the fund financial statements is presented only to facilitate financial analysis. Data in this column is not the equivalent of consolidated financial information.

NOTE 2 – CASH AND INVESTMENTS

A cash and investment pool is maintained that is available for use by all funds. Each fund type's portion of this pool is displayed on the balance sheet as "Cash and Cash Equivalents". The deposits and investments of the trust funds are held separately from those of other funds.

Statutes authorize the investment in obligations of the U. S. Treasury, agencies, and instrumentalities, certificates of deposit, repurchase agreements, money market accounts, bank deposits and the Treasurer of the Commonwealth's Investment Pool (Pool). The Town Treasurer may also invest trust funds in securities, other than mortgages or collateral loans, which are legal for the investment of funds of savings banks under the laws of the Commonwealth.

The Pool meets the criteria of an external investment pool. The Pool is administered by the Massachusetts Municipal Depository Trust (MMDT), which was established by the Treasurer of the Commonwealth who serves as trustee. The fair value of the position in the Pool is the same as the value of the Pool shares.

The Town invests in the MMDT cash portfolio. The cash portfolio had a weighted average maturity of 28 days.

The Retirement System participates, as a participating member, in the Pension Reserves Investment Trust (PRIT), which meets the criteria of an external investment pool. PRIT is administered by the Pension Reserves Investment Management Board, which was established by the Treasurer of the Commonwealth of Massachusetts who serves as trustee. The fair value of the position in the PRIT is the same as the value of the PRIT shares.

The PRIT fund, as a pool, invests in various products including, but not limited to, money market mutual funds, equities, pooled foreign and domestic fixed income and equity funds, United States government sponsored enterprises and Treasury notes, real estate, and commodities. The underlying components of PRIT's fixed income portfolio had an effective weighted duration rate ranging from 0.18 to 15.31 years.

Custodial Credit Risk – Deposits

In the case of deposits, this is the risk that in the event of a bank failure, the Town's deposits may not be returned to it. The Town policy for mitigating custodial credit risk is that the Town will not have on deposit amounts exceeding 10% of capital and surplus and 10% of net equity, unless those deposits carry full FDIC insurance or are collateralized. In addition, it is the Towns' policy that at no time shall any single bank or bank holding company hold an excess of 25% of the cash balance under the control of the Treasurer for more than three consecutive days.

At year-end the carrying amount (book value) of the Town's deposits totaled \$26,671,989 and the bank balances totaled \$26,902,823. Of the bank balance, \$20,517,455 was covered by FDIC insurance, \$60,896 was covered by SIF insurance, \$3,000,000 was collateralized, and \$3,324,472 was exposed to custodial credit risk because it was uninsured and uncollateralized.

At December 31, 2018, the carrying amount (book value) of the Retirement System's deposits totaled \$294,452 and the bank balance totaled \$478,485. The bank balance was fully covered by FDIC insurance.

As of June 30, 2019, the Town had the following investments:

<u>Investment Type</u>	<u>Fair value</u>	<u>Maturities</u>		<u>Rating</u>
		<u>Under 1 Year</u>	<u>1-5 Years</u>	
<u>Debt securities:</u>				
U.S. treasury bonds.....	\$ 2,289,561	\$ 2,289,561	\$ -	AAA
Government sponsored enterprises (1).....	23,069,741	20,564,582	2,505,159	AAA
Corporate bonds (2).....	989,349	165,842	823,507	AAA - A
Total debt securities.....	26,348,651	\$ 23,019,985	\$ 3,328,666	
<u>Other investments:</u>				
Equity securities.....	1,242,498			
Money market mutual funds.....	598,572			
Pension Reserve Investment Trust (PRIT).....	69,983,461			
MMDT - Cash portfolio.....	34,494,737			
Total investments.....	\$ 132,667,919			

(1) Government Sponsored Enterprises include various short-term investments in financial services corporations created by the United States Congress. These investments primarily consist of investments in Federal Home Loan Banks (FHLB), Federal Financing Corporation (FICO) Strips, and Federal Home Loan Mortgage Corporation Notes.

(2) Corporate bonds are broken out into 3 separate ratings, which consist of \$80,000 of AAA rated bonds, \$101,283 of AA rated bonds, and \$808,066 of A rated bonds.

As of December 31, 2018, the Retirement System had investments in PRIT totaling \$186,914,037. The Retirement System also maintains a short term investment portfolio with MMDT. At December 31, 2018, the Retirement System's investment with MMDT was \$640,197 which is classified as a cash equivalent.

The following table reconciles total cash and investments as of June 30, 2019, except for the Pension Trust Fund which is as of December 31, 2018:

	Cash and Cash Equivalents	Restricted Cash and Cash Equivalents	Investments	Total
Primary Government:				
Governmental Activities.....	\$ 43,835,492	\$ -	\$ 27,060,325	\$ 70,895,817
Business-Type Activities.....	15,149,064	1,000,000	-	16,149,064
Fiduciary Funds:				
Pension Trust Fund (as of December 31, 2018).....	934,649	-	186,914,037	187,848,686
Other Postemployment Benefit Trust Fund.....	-	-	69,983,462	69,983,462
Private Purpose Trust Fund.....	8,470	-	530,823	539,293
Agency Fund.....	1,772,272	-	-	1,772,272
Totals.....	\$ 61,699,947	\$ 1,000,000	\$ 284,488,647	\$ 347,188,594
Carrying Value of Cash:				
Primary Government.....	\$ 26,671,989			
Pension Trust Fund.....	294,452			
Investments considered cash and cash equivalents:

Investments.....	284,488,647			
Total cash and cash equivalents.....	\$ 347,188,594			

Custodial Credit Risk – Investments

For an investment, this is the risk that, in the event of a failure by the counterparty, the Town will not be able to recover the value of its investments or collateral security that are in the possession of an outside party. Of the Town’s total investments there was custodial credit risk exposure of \$24,312,239 which is equal to the investments in Government Sponsored Enterprises and Equity Securities because the related securities are uninsured, unregistered and held by the counterparty.

The Town will minimize Custodial Credit Risk, which is the risk of loss due to the failure of the security issuer or backer, by; limiting investments to the types of securities listed in the Statutory Authority section of the Town’s Investment Policy; and obtaining necessary documentation (e.g. broker certification forms and documentation of perfected security interests in pledged collateral) from the financial institutions, broker/dealers, intermediaries and advisors, as applicable, with which the Town will do business in accordance with this Investment Policy. Some of this risk will be managed requiring that the above referenced financial institutions, broker/dealers, intermediaries and advisors have Securities Investor Protection Corporation (SIPC) and excess SIPC coverage.

At December 31, 2018, the System’s \$186,914,037 investment in PRIT is not subject to custodial credit risk exposure because it is not evidenced by securities that exist in physical or book-entry form.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment the greater the sensitivity of its fair value to changes in market interest rates. The Town and the System's investment policy is to follow state statutes, which limits investment maturities as a means of managing its exposure to fair value losses arising from increasing rates.

Credit Risk

Credit risk exists when there is a possibility the issuer or other counterparty to an investment may be unable to meet its obligations. The Town's policy for credit risk requires all financial institutions wishing to do business with the Town to read the Town's Investment Policy and to agree to comply with it. This policy requires minimum standards of credit worthiness as well as guidance for the types of investment allowed.

Concentration of Credit Risk

The Town has adopted a formal policy to mitigate concentration of credit risk by mandating that the Town may not at any one time have on deposit in a bank or trust company an amount exceeding 60% of the capital and surplus of that institution. The Town will not deposit amounts exceeding 10% of capital and surplus and 10% of net equity unless the deposits are fully collateralized.

Fair Value Measurement

The Town holds investments that are measured at fair value on a recurring basis. Because investing is not a core part of the Town's mission, the Town determines that the disclosures related to these investments only need to be disaggregated by major type. The Town chooses a tabular format for disclosing the levels within the fair value hierarchy.

The Town categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

The following table presents financial assets at June 30, 2019, that the Town measures fair value on a recurring basis, by level, within the fair value hierarchy:

Investment Type	June 30, 2019	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments measured at fair value:				
<u>Debt securities:</u>				
U.S. treasury notes.....	\$ 2,289,561	\$ 2,289,561	\$ -	\$ -
Government sponsored enterprises.....	23,069,741	23,069,741	-	-
Corporate bonds.....	989,349	-	989,349	-
Total debt securities.....	26,348,651	25,359,302	989,349	-
<u>Other investments:</u>				
Equity securities.....	1,242,498	1,242,498	-	-
Money market mutual funds.....	598,572	598,572	-	-
Total other investments.....	1,841,070	1,841,070	-	-
Total investments measured at fair value.....	28,189,721	\$ 27,200,372	\$ 989,349	\$ -
Investments measured at amortized cost:				
MMDT - Cash portfolio.....	34,494,737			
Investments measured at net asset value:				
Pension Reserve Investment Trust (PRIT).....	69,983,461			
Total investments.....	\$ 132,667,919			

Equity securities, U.S. Treasury Notes, Government Sponsored Enterprises, and Money Mutual Funds are classified in Level 1 of the fair value hierarchy using prices quoted in active markets for those securities. Debt securities classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices.

PRIT Investments are valued using the net asset value method. This investment pool was established by the Treasurer of the Commonwealth of Massachusetts, who serves as Trustee. PRIT is administered by the Pension Reserves Investment Management Board (PRIM). The fair values of the positions in each investment Pool are the same as the value of each Pool's shares. The Town does not have the ability to control any of the investment decisions relative to its funds in PRIT.

The investment in MMDT is comprised of a cash portfolio and a bond portfolio. The cash portfolio is valued at amortized cost. Under the amortized cost method, an investment is valued initially at its cost and adjusted for the amount of interest income accrued each day over the term of the investment to account for any difference between the initial cost and the amount payable at its maturity. If amortized cost is determined not to approximate fair value, the value of the portfolio securities will be determined under procedures established by the Advisor. The bond portfolio is valued at fair value.

Retirement System

The retiree pension defined benefit plan holds significant amounts of investments that are measured at fair value on a recurring basis. Because investing is a key part of the plan’s activities, the plan shows greater disaggregation in its disclosures.

The System categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles.

The System has the following recurring fair value measurements as of December 31, 2018:

Investments measured at amortized cost:	
MMDT - Cash portfolio.....	\$ 640,197
 Investments measured at net asset value:	
Pension Reserve Investment Trust (PRIT).....	<u>186,914,037</u>
Total investments.....	<u>\$ 187,554,234</u>

The System’s investments in PRIT and MMDT are the same as the Town’s investments described above.

NOTE 3 – RECEIVABLES

At June 30, 2019, receivables for the individual major, non-major governmental funds, and the proprietary internal service fund, in the aggregate, including the applicable allowances for uncollectible accounts, are as follows:

	Gross Amount	Allowance for Uncollectibles	Net Amount
<u>Receivables:</u>			
Real estate and personal property taxes.....	\$ 2,526,672	\$ (13,494)	\$ 2,513,178
Tax liens.....	1,252,509	-	1,252,509
Community preservation fund surtax.....	4,920	-	4,920
Motor vehicle and other excise taxes.....	580,436	(283,973)	296,463
Departmental and other.....	286,554	-	286,554
Intergovernmental.....	2,221,959	-	2,221,959
Total.....	\$ 6,873,050	\$ (297,467)	\$ 6,575,583

- (1) The allowance for uncollectible accounts of \$13,494 relates only to personal property taxes.
- (2) The allowance for uncollectible motor vehicle excise taxes relates primarily to balances outstanding five years and older.

At June 30, 2019, receivables for the sewer, water, electric enterprise funds and the internal service fund consist of the following:

	Gross Amount	Allowance for Uncollectibles	Net Amount
Receivables:			
Water user charges.....	\$ 678,356	\$ -	\$ 678,356
Sewer user charges.....	688,310	-	688,310
Electric light user charges.....	3,438,815	-	3,438,815
Total.....	\$ 4,805,481	\$ -	\$ 4,805,481

Governmental funds report *unavailable revenue* in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. At the end of the current year, the various components of *unavailable revenue* reported in the governmental funds were as follows:

	General Fund	Other Governmental Funds	Total
Receivables:			
Real estate and personal property taxes..	\$ 2,241,810	\$ -	\$ 2,241,810
Tax liens.....	1,252,509	-	1,252,509
Motor vehicle and other excise taxes.....	296,463	-	296,463
Departmental and other.....	38,778	152,667	191,445
Intergovernmental - state highway.....	-	563,038	563,038
Intergovernmental - other.....	-	144,193	144,193
Total.....	\$ 3,829,560	\$ 859,898	\$ 4,689,458

NOTE 4 – CAPITAL ASSETS

A summary of changes in capital asset activity for the year ended June 30, 2019, is as follows:

	Beginning Balance	Increases	Decreases	Ending Balance
Governmental Activities:				
<u>Capital assets not being depreciated:</u>				
Land.....	\$ 51,959,370	\$ -	\$ -	\$ 51,959,370
Construction in progress.....	1,977,524	6,890,582	(369,262)	8,498,844
Total capital assets not being depreciated....	53,936,894	6,890,582	(369,262)	60,458,214
<u>Capital assets being depreciated:</u>				
Improvements other than buildings.....	29,800,325	-	-	29,800,325
Buildings.....	273,206,619	556,262	-	273,762,881
Machinery and equipment.....	20,315,373	1,894,331	(601,431)	21,608,273
Public domain infrastructure.....	68,954,195	1,508,280	-	70,462,475
Total capital assets being depreciated.....	392,276,512	3,958,873	(601,431)	395,633,954
<u>Less accumulated depreciation for:</u>				
Improvements other than buildings.....	(16,475,103)	(1,994,662)	-	(18,469,765)
Buildings.....	(93,245,571)	(9,361,704)	-	(102,607,275)
Machinery and equipment.....	(13,581,291)	(1,045,193)	601,431	(14,025,053)
Public domain infrastructure.....	(37,116,526)	(1,809,768)	-	(38,926,294)
Total accumulated depreciation.....	(160,418,491)	(14,211,327)	601,431	(174,028,387)
Total capital assets being depreciated, net.....	231,858,021	(10,252,454)	-	221,605,567
Total governmental activities capital assets, net.....	\$ 285,794,915	\$ (3,361,872)	\$ (369,262)	\$ 282,063,781

Business-Type Activities:	Beginning Balance	Increases	Decreases	Ending Balance
<u>Capital assets not being depreciated:</u>				
Land and land rights.....	\$ 267,946	\$ -	\$ -	\$ 267,946
Construction in progress.....	4,305,119	1,863,952	(5,700,751)	468,320

Depreciation expense was charged to Town functions as follows:

Governmental Activities:

General government.....	\$ 1,133,132
Public safety.....	1,030,483
Public education.....	8,173,712
Public works.....	2,845,874
Recreation.....	270,527
Library.....	<u>757,599</u>
Total depreciation expense - governmental activities.....	<u>\$ 14,211,327</u>

Business-Type Activities:

Water.....	\$ 897,598
Sewer.....	446,059
Municipal Light.....	<u>3,781,679</u>
Total depreciation expense - business-type activities.....	<u>\$ 5,125,336</u>

NOTE 5 – INTERFUND TRANSFERS, RECEIVABLES AND PAYABLES

At June 30, 2019, the Town had an interfund receivable/payable of \$1,506,476 between the general fund and the highway chapter 90 fund to meet temporary cash flow needs

Interfund transfers for the year ended June 30, 2019, are summarized as follows:

Transfers Out:	Transfers In		Total	
	General fund	Capital Projects		
General fund.....	\$ -	\$ 1,970,670	\$ 1,970,670	(1)
Highway Chapter 90.....	17,940	-	17,940	(2)
Nonmajor governmental funds.....	1,161,396	544,128	1,705,524	(2)
Electric Light Department.....	1,000,000	-	1,000,000	(3)
Total.....	\$ 2,179,336	\$ 2,514,798	\$ 4,694,134	

- (1) Budgeted transfers to the Capital Projects fund for capital improvement costs.
- (2) Budgeted transfers from various nonmajor funds to the general fund and capital project funds; and transfers to close dormant funds.
- (3) Transfers from the Electric Department as a payment in lieu of taxes.

NOTE 6 – SHORT-TERM FINANCING

Short-term debt may be authorized and issued to fund the following:

- Current operating costs prior to the collection of revenues through issuance of revenue or tax anticipation notes (RANS or TANS).
- Capital project costs and other approved expenditures incurred prior to obtaining permanent financing through issuance of bond anticipation notes (BANS) or grant anticipation notes (GANS).

Short-term loans are general obligations and carry maturity dates that are limited by statute. Interest expenditures and expenses for short-term borrowings are accounted for in the general fund. The Town did not have any short-term debt activity in 2019.

NOTE 7 – OPERATING LEASE

The Town is party to an operating lease agreement that provides the Town with office space for certain administrative functions. The current lease agreement runs through May 31, 2020. The lease agreement requires the Town to pay rent in the amount of \$7,000 per month. The amount due and payable for 2020 is \$77,000.

NOTE 8 – LONG-TERM DEBT

Under the provisions of Chapter 44, Section 10, Municipal Law authorizes indebtedness up to a limit of 5% of the equalized valuation. Debt issued in accordance with this section of the law is designated as being "inside the debt limit". In addition, however, debt may be authorized in excess of that limit for specific purposes. Such debt, when issued, is designated as being "outside the debt limit" as 2 ½ % exempt debt.

Details related to the Town’s outstanding general obligation indebtedness at June 30, 2019, and the debt service requirements for the governmental activities are as follows.

Project	Maturities Through	Original Loan Amount	Interest Rate (%)	Outstanding at June 30, 2018	Issued	Redeemed	Outstanding at June 30, 2019
Inside Debt Limit							
Parking Meters.....	2019	\$ 120,000	3.40	\$ 10,000	\$ -	\$ 10,000	\$ -
Woodside Avenue.....	2019	415,000	3.40	40,000	-	40,000	-
RDF Structure.....	2023	570,000	1.46	275,000	-	55,000	220,000

Internal service funds predominantly serve the governmental funds. Accordingly, the internal service fund's long-term liabilities are included as part of the governmental activities totals above. At year end, \$452,000 of internal service funds accrued workers compensation liability is included above. Except for the amounts related to the internal service funds, the governmental activities long-term liabilities are generally liquidated by the general fund. Compensated absence liabilities related to both governmental and business-type activities are normally paid from the funds reporting payroll and related expenditures, namely the general fund and the water, sewer and electric enterprise funds.

NOTE 9 – GOVERNMENTAL FUND BALANCE CLASSIFICATIONS

The Town classifies fund balance according to the constraints imposed on the use of resources.

At June 30, 2019, \$3,371,774, \$564,669, \$760,775, and \$806,179 have been set aside in a general stabilization fund, an injured on duty stabilization fund, a special education Medicare stabilization fund, and a stabilization fund for purposes of meeting capital needs at the recycling facility, respectively, that are classified as part of the general fund in the governmental funds financial statements. Municipal finance laws of the Commonwealth of Massachusetts authorize municipalities to establish stabilization funds on an as needed basis. The number of and exact purpose of the stabilization funds of the Town are dependent upon authorization and approval of Town Meeting. The general stabilization fund balance can be used for general and/or capital purposes upon approval of Town Meeting. The special purpose stabilization fund can only be used to offset police and fire workers compensation claim payments. Additions and withdrawals from the funds can only be made in accordance with Town Meeting approval.

There are two major types of fund balances, which are nonspendable and spendable. Nonspendable fund balances are balances that cannot be spent because they are not expected to be converted to cash or they are legally or contractually required to remain intact. Examples of this classification are prepaid items, inventories, and principal (corpus) of an endowment fund. The Town has reported principal portions of endowment funds as nonspendable.

In addition to the nonspendable fund balance, GASB 54 has provided a hierarchy of spendable fund balances, based on a hierarchy of spending constraints.

- Restricted: fund balances that are constrained by external parties, constitutional provisions, or enabling legislation.
- Committed: fund balances that contain self-imposed constraints of the government from its highest level of decision making authority. The Town's highest level of decision making authority is the Annual Town Meeting.
- Assigned: fund balances that contain self-imposed constraints of the government to be used for a particular purpose.
- Unassigned: fund balance of the general fund that is not constrained for any particular purpose.

The Town has classified its fund balances with the following hierarchy:

	General	Capital Projects	Nonmajor Governmental Funds	Total Governmental Funds
Fund Balances:				
Nonspendable:				
Permanent fund principal..... \$	-	-	\$ 474,055	\$ 474,055
Restricted for:				
Capital projects	-	10,082,102	-	10,082,102
School lunch.....	-	-	679,300	679,300
Community Preservation Fund.....	-	-	7,540,763	7,540,763
Grants.....	-	-	622,791	622,791
Receipts Reserved.....	-	-	2,420,572	2,420,572
Revolving.....	-	-	3,648,278	3,648,278
Recreation Revolving.....	-	-	464,451	464,451
Other Special Revenue.....	-	-	2,939,582	2,939,582
Permanent fund.....	-	-	341,694	341,694
Committed to:				
Articles and continuing appropriations:				
Executive Director's Office.....	3,195	-	-	3,195
Sustainable Energy.....	70	-	-	70
Information Technology.....	13,183	-	-	13,183

Unassigned.....	24,245,720	-	-	24,245,720
Total Fund Balances..... \$	<u>31,147,592</u>	<u>\$ 10,082,102</u>	<u>\$ 19,131,486</u>	<u>\$ 60,361,180</u>

NOTE 10 – RISK FINANCING

The Town is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Town has purchased commercial insurance for these risks, except for those risks identified in the following paragraphs, which the Town accounts for in its Internal Service Fund. The amount of claim settlements has not exceeded insurance coverage in any of the previous three years.

The Town entered into an agreement with certain suburban communities and other governmental units forming the West Suburban Health Group (the “Group”). The purpose of the Group is for the joint negotiation and purchase of health insurance coverage with various carriers. Under these agreements, the insurance claims of the covered employees are paid for by the insurance carrier and are subsequently reimbursed by the Group. The Group charges monthly premiums to each governmental unit based upon requirements established through underwriting or actuarial estimates. The Group also maintains a deposit with the insurance carrier which is sufficient to cover two months of claims paid by the carrier for the Group. In addition, the Group provides full reinsurance coverage for all claim costs in excess of \$225,000 per covered employee.

In the event of a dissolution of the Group or if the assets of the Group are insufficient to pay claims which occur, the Town remains liable. The Group had a fund balance of approximately \$6.8 million at June 30, 2018 (based on the most recent audited information available), which appears sufficient to cover future claims. The Town’s total potential liability is not based on its participants’ claims but on the pro rata share of any deficit based on the ratio of the Town’s members to total participants at the time of dissolution. At June 30, 2019, the Group’s mandatory deposit, discussed above, is sufficient to cover the Town’s projected liability for incurred but not reported claims as of that date.

The Town is self-insured for workers’ compensation claims. The Town has recorded an actuarially determined loss liability in its Internal Service Fund to reserve against future losses. This liability includes a provision for estimated claims incurred but not reported. In addition to these reserves, the Town retains insurance against claims in excess of \$250,000 per employee.

Changes in the Workers’ Compensation Fund claims liability amount for the years ended June 30 were as follows:

	Balance at Beginning of Year	Current Year Claims and Changes in Estimate	Claims Payments	Balance at Year-End	Current Portion
2018.....	\$ 435,000	\$ 417,656	\$ (405,656)	\$ 447,000	\$ 181,000
2019.....	447,000	473,059	(468,059)	452,000	235,000

NOTE 11 – PENSION PLAN

Plan Descriptions

The Town is a member of the Wellesley Contributory Retirement System (WCRS), a cost-sharing multiple-employer defined benefit pension plan covering eligible employees of its 2 member units (the Town and the Wellesley Housing Authority). The System is administered by five board members (Board) on behalf of all current employees and retirees except for current teachers and retired teachers. Chapter 32 of the MGL assigns authority to establish and amend benefit provisions of the plan. The System is a component unit and is reported as a pension trust fund in the fiduciary fund financial statements.

The Town is a member of the Massachusetts Teachers' Retirement System (MTRS), a cost-sharing multi-employer defined benefit plan. MTRS is managed by the Commonwealth of Massachusetts (Commonwealth) on behalf of municipal teachers and municipal teacher retirees. The Commonwealth is a nonemployer contributor and is responsible for 100% of the contributions and future benefit requirements of the MTRS. The MTRS covers certified teachers in cities (except Boston), towns, regional school districts, charter schools, educational collaboratives and Quincy College. The MTRS is part of the Commonwealth's reporting entity and the audited financial report may be obtained by visiting <http://www.mass.gov/osc/publications-and-reports/financial-reports/>.

Special Funding Situation

The Commonwealth is a nonemployer contributor and is required by statute to make 100% of all actuarially determined employer contributions on behalf of the Town to the MTRS. Therefore, the Town is considered to be in a special funding situation as defined by GASB Statement No. 68, *Accounting and Financial Reporting for Pensions* and the Commonwealth is a nonemployer contributor in MTRS. Since the Town does not contribute directly to MTRS, there is no net pension liability to recognize. The total of the Commonwealth provided contributions have been allocated based on each employer's covered payroll to the total covered payroll of employers in MTRS as of the measurement date of June 30, 2018. The Town's portion of the collective pension expense, contributed by the Commonwealth, of \$17,745,908 is reported in the general fund as intergovernmental revenue and pension benefits in the current fiscal year. The portion of the Commonwealth's collective net pension liability associated with the Town is \$175,120,312 as of the measurement date.

Benefits Provided

Both Systems provide retirement, disability, survivor and death benefits to plan members and beneficiaries. Massachusetts Contributory Retirement System benefits are, with certain minor exceptions, uniform from system to system. The Systems provide retirement allowance benefits up to a maximum of 80% of a member's highest three-year average annual rate of regular compensation. For persons who became members on or after April 2, 2012, average salary is the average annual rate of regular compensation received during the five consecutive years that produce the highest average, or, if greater, during the last five years (whether or not consecutive) preceding retirement. Benefit payments are based upon a member's age, length of creditable service, level of compensation, and group classification. Members become vested after ten years of creditable service.

Employees who resign from service and who are not eligible to receive a retirement allowance or are under the age of 55 are entitled to request a refund of their accumulated total deductions. Survivor benefits are extended to eligible beneficiaries of members whose death occurs prior to or following retirement.

Cost-of-living adjustments granted between 1981 and 1997 and any increase in other benefits imposed by the Commonwealth's state law during those years are borne by the Commonwealth and are deposited into the pension fund. Cost-of-living adjustments granted after 1997 must be approved by the Board and are borne by the System.

At December 31, 2018, the WCRS membership consists of the following:

Active members.....	702
Inactive members.....	211
Retirees and beneficiaries currently receiving benefits.....	<u>403</u>
Total.....	<u><u>1,316</u></u>

Contributions

Chapter 32 of the MGL governs the contributions of plan members and member units. Active plan members are required to contribute at rates ranging from 5% to 9% of gross regular compensation with an additional 2% contribution required for compensation exceeding \$30,000. The percentage rate is keyed to the date upon which an employee's membership commences. The member units are required to pay into the WCRS a legislatively mandated actuarial determined contribution that is apportioned among the employers based on active current payroll. The total member units' contribution for the year ended December 31, 2018, was an actuarially determined amount of \$8,349,999. This amount when combined with plan member contributions is expected to finance the costs of benefits earned by plan members during the year, with an additional amount to finance any unfunded accrued liability. The total member unit's contribution is equal to 21.16% of covered payroll. The Town's proportionate share of the required contribution was \$8,285,437. The Town contributed \$8,306,667, \$21,230 in excess of the required amount.

Pension Liabilities

The components of the net pension liability of the participating member units at December 31, 2018 were as follows:

	<u>Total System</u>	<u>Town Share</u>	<u>Housing Authority Share</u>
Total pension liability.....	\$ 249,486,962	\$ 247,545,359	\$ 1,941,603
Total pension plan's fiduciary net position.....	<u>(187,948,601)</u>	<u>(186,485,913)</u>	<u>(1,462,688)</u>
Total net pension liability.....	<u>\$ 61,538,361</u>	<u>\$ 61,059,446</u>	<u>\$ 478,915</u>
The pension plan's fiduciary net position as a percentage of the total pension liability.....	75.33%	75.33%	75.33%

At June 30, 2019, the Town reported a liability of \$61,059,446 for its proportionate share of the net pension liability. The net pension liability was measured as of December 31, 2018, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of January 1, 2019. The Town's proportion of the net pension liability was based on a projection of the Town's long-term share of contributions to the pension plan relative to the projected contributions of all participating members. At December 31, 2018, the Town's proportion was 99.22%, which increased from its proportion measured at December 31, 2017 of 99.15%.

Pension Expense

For the year ended June 30, 2019, the Town recognized pension expense of \$8,263,552. At June 30, 2019, the Town reported deferred outflows and (inflows) of resources related to pensions of \$12,312,886 and (\$4,646,637), respectively, from difference between expected and actual experience, changes of assumptions, differences between projected and actual earnings, and the proportionate share of contributions.

The balances of deferred outflows and inflows at June 30, 2019 consist of the following:

Deferred Category	Deferred Outflows of Resources	Deferred Inflows of Resources	Total
Differences between expected and actual experience.....	\$ 2,357,082	\$ (2,524,920)	\$ (167,838)
Difference between projected and actual earnings.....	5,029,035	-	5,029,035
Changes in assumptions.....	2,803,528	-	2,803,528
Changes in proportion and proportionate share of contributions...	2,123,241	(2,121,717)	1,524
Total deferred outflows/(inflows) of resources.....	\$ 12,312,886	\$ (4,646,637)	\$ 7,666,249

The Town’s net deferred outflows (inflows) of resources related to pensions will be recognized in pension expense as follows:

<u>Year ended June 30:</u>	
2020.....	\$ 2,895,987
2021.....	100,120
2022.....	286,881
2023.....	3,905,020
2024.....	478,241
Total.....	\$ 7,666,249

Actuarial Assumptions – The total pension liability as of December 31, 2018, was determined by an actuarial valuation as of January 1, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Valuation date.....	January 1, 2019
Actuarial cost method.....	Entry Age Normal Cost Method.
Amortization method.....	Level dollar for 2010 ERI liability and 3.5% increasing payments through June 30, 2022.
Remaining amortization method.....	As of July 1, 2017, 5 years for the 2010 ERI liability and 13 years for the remaining unfunded liability.
Asset valuation method.....	Fair value of assets are reported in the System's Annual Statement less unrecognized return in each of the last five years with a fresh start as of January 1, 2015. Unrecognized return is equal to the difference between the actual market value return and the expected market value return and if recognized over a five-year period, further adjusted, if necessary, to be within 20% of the market value.
Inflation rate.....	2.75%
Projected salary increases.....	Based on years of service, ranging from 7.00% decreasing to 3.50% after 11 years of service Group 1 and 2 employees, and ranging from 8.00% decreasing to 4.00% after 11 years for Group 4 employees.

Cost of living adjustments.....	2.75% increase on the first \$17,000 (previously, \$15,000) of retirement allowance.
Rates of retirement.....	Varies based upon age for general employees, police and fire employees.
Mortality rates:	
Pre-Retirement.....	RP-2014 Blue Collar Employee Mortality Table set forward one year for females projected generationally with Scale MP-2016.
Healthy Retiree.....	RP-2014 Blue Collar Healthy Annuitant Mortality Table set forward one year for females projected generationally with Scale MP-2016.
Disabled Retiree.....	RP-2000 Healthy Annuitant Mortality Table projected generationally with Scale BB from 2015.
Investment rate of return/Discount rate.....	6.625%, net of pension plan investment expense, including inflation.

Investment policy

The pension plan’s policy in regard to the allocation of invested assets is established by PRIT. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the pension plan.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan’s target asset allocation as of December 31, 2018, and the target allocations as of December 31, 2018, are summarized in the following table:

Asset Class	Long-Term Expected Asset Allocation	Long-Term Expected Real Rate of Return
Domestic equity.....	21.00%	6.16%
International developed markets equity..	13.00%	6.69%
International emerging markets equity...	5.00%	9.47%
Core fixed income.....	15.00%	1.89%
High-yield bonds.....	8.00%	4.00%
Real estate.....	10.00%	4.58%
Commodities.....	4.00%	4.77%
Hedge fun, GTAA, Risk parity.....	11.00%	3.68%
Private equity.....	13.00%	10.00%
Total.....	100.00%	

The weighted average expected real rate of return is approximately 5.6%, which is greater than the discount rate used of 6.625% that includes inflation of 2.75%.

Rate of return

For the year ended December 31, 2018, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was a loss of (-2.39%). The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Discount rate

The discount rate used to measure the total pension liability was 6.625% (net of pension plan investment expense, including inflation). The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that contributions will be made at rates equal to the actuarially determined contribution rates. Based on those assumptions, the pension plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the net pension liability to changes in the discount rate

The following presents the net pension liability, calculated using the discount rate of 6.625% as well as what the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.625%) or 1-percentage-point higher (7.625%) than the current rate:

	1% Decrease (5.625%)	Current Discount (6.625%)	1% Increase (7.625%)
	<u> </u>	<u> </u>	<u> </u>
The Town's proportionate share of the net pension liability.....	\$ 91,446,609	\$ 61,059,446	\$ 35,640,164
Total System's net pension liability.....	<u>\$ 92,163,863</u>	<u>\$ 61,538,361</u>	<u>\$ 35,919,705</u>

Changes in Assumptions –

- The investment return assumption was decreased from 6.75% to 6.625%.
- The mortality assumptions was changed from the RP-2014 Blue Collar Employee and Healthy Annuitant Mortality Tables with MP-2014 improvement projections backed out to a base year of 2006 and projected generationally with Scale BB to the RP-2014 Blue Collar Employee and Healthy Annuitant Tables set forward one year for females projected generationally with Scale MP-2016.
- The mortality assumption for disabled participants was changed from the RP-2014 Blue Collar Healthy Annuitant Mortality Table projected with MP-2014 improvement projections backed out to a base year of 2006 and projected generationally with Scale BB set forward 3 years for males to the RP-2000 Healthy Annuitant Mortality Table projected generationally with Scale BB from 2015.
- The administrative expense assumption was increased from \$250,000 to \$275,000.
- The inflation rate was lowered from 3.5% to 2.75%.
- The Cost of Living Adjustment assumption was changed from a 3.00% increase on the first \$15,000 of retirement allowance to a 2.75% increase on the first \$15,000 of retirement allowance.

Changes in Plan Provisions –

- The Cost of Living Adjustment base was increased to \$16,000 effective July 1, 2018, \$17,000 effective July 1, 2019 and to \$18,000 effective July 1, 2020.

NOTE 12 – POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS

Plan Description – The Town maintains a single employer defined benefit healthcare plan (“The Other Postemployment Benefit Plan”). The plan provides lifetime healthcare and life insurance for eligible retirees and their spouses. Chapter 32B of the MGL assigns authority to establish and amend benefit provisions of the Plan. The plan provides the benefits by participating in the West Suburban Health Group. Medical and prescription drug benefits are provided to all eligible retirees through a variety of plans offered by Blue Cross Blue Shield of Massachusetts, Harvard Pilgrim Health Care, Tufts Health Plan, and Fallon Community Health Plan, as well as an out-of-area indemnity plan administered by North American Administrators. Benefit provisions are negotiated between the Town and the unions representing Town employees and are renegotiated each bargaining period. The plan also pays 50% of the retiree life insurance premiums. The Other Postemployment Benefit Plan does not issue a publicly available financial report.

The Town adopted MGL, Chapter 32B, Section 18 in April 2006, requiring all Medicare-eligible retirees to enroll in a Medicare supplement plan. The effects of this adoption have been included in the determination of OPEB liabilities by the Town’s actuary.

Funding Policy – Contribution requirements are also negotiated between the Town and union representatives. Retired plan members and beneficiaries currently receiving benefits are required to contribute between 17.7% and 50% of the cost of benefits provided depending on the plan they choose. The Town is required to contribute the balance of the current premiums and may contribute additional amounts to pre-fund benefits. The Town contributed \$9,265,150 during 2019 towards these benefits including the pre-funding amount discussed below. Administrative costs of the Plan are assumed to be included in the fully insured premium rates. For the year ended June 30, 2019, the Town’s average contribution rate was 9.2% of covered payroll.

The Commonwealth of Massachusetts passed special legislation that has allowed the Town to establish the postemployment benefit trust fund and to enable the Town to raise taxes necessary to pre-fund its OPEB liabilities. During 2019, the Town pre-funded future OPEB liabilities in the amount of \$3,645,843 by contributing funds to the Other Postemployment Benefit Fund in excess of the pay-as-you-go required contribution.

The Town’s governmental operations and the water and sewer business-type operations have established a funding schedule, calculated through the actuarial valuation, to fund the outstanding liability over the next 18 years. The Municipal Light business-type activity has adopted a more aggressive funding schedule. As a result, the Municipal Light Department has reported a net OPEB asset as of June 30, 2019. The net asset has been blended with the Town’s net OPEB liability in the following disclosures.

GASB Statement #74 – OPEB Plan Financial Reporting

Measurement Date – GASB #74 requires the net OPEB liability to be measured as of the OPEB Plan’s most recent fiscal year-end. Accordingly, the net OPEB liability was measured as of June 30, 2019, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of December 31, 2018.

Employees Covered by Benefit Terms – The following table represents the Plan’s membership at June 30, 2019:

Active members.....	936
Inactive members currently receiving benefits.....	928
	<hr/>
Total.....	1,864
	<hr/> <hr/>

Components of OPEB Liability – The following table represents the components of the Plan’s OPEB liability as of June 30, 2019:

Total OPEB liability.....	\$	120,899,268
Less: OPEB plan's fiduciary net position.....		<u>(69,983,462)</u>
Net OPEB liability.....	\$	<u>50,915,806</u>
The OPEB plan's fiduciary net position		
as a percentage of the total OPEB liability.....		57.89%

Significant Actuarial Methods and Assumptions – The total OPEB liability in the December 31, 2018, actuarial valuation was determined by using the following actuarial assumptions, applied to all periods included in the measurement that was updated to June 30, 2019 to be in accordance with GASB #74.

Valuation date.....	Actuarially determined contribution for the fiscal year ending June 30, 2019 was determined with the December 31, 2018 actuarial valuation.
Actuarial cost method.....	Entry age normal cost method.
Amortization method.....	Payments increase at 3.0% per year.
Remaining amortization period.....	19 years as of July 1, 2018.
Asset valuation method.....	Fair value.
Discount rate/Investment rate of return.....	6.625%
Inflation rate.....	3.00%
Health care trends rate.....	Medical and Prescription Drug: 7.0% decreasing by 0.5% each year to an ultimate level of 4.5% per year. Medical Part B Premium: 4.5%.
Mortality rates.....	Pre-Retirement (Non-Teachers): RP-2014 Blue Collar Employee Mortality Table projected generationally with Scale MP-2016 set forward one year for females. Healthy (Non-Teachers): RP-2014 Blue Collar Healthy Annuitant Mortality Table projected generationally with Scale MP-2016 set forward one year for females. Disabled (Non-Teachers): RP-2000 Healthy Annuitant Mortality Table projected generationally with Scale BB2D from 2015. Pre-Retirement (Teachers): RP-2014 White Collar Employee Mortality Table projected generationally with Scale MP-2016. Healthy (Teachers): RP-2014 White Collar Employee Mortality Table projected generationally with Scale MP-2016. Disabled (Teachers): RP-2014 White Collar Employee Mortality Table projected generationally with Scale MP-2016.

Rate of return – For the year ended June 30, 2019, the annual money-weighted rate of return on investments, net of investment expense, was 5.79%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation and subtracting expected investment expense and a risk margin. The target allocation and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before investment expenses, used in the derivation of the long-term expected investment rate of return assumption are summarized in the following table:

Revenue

Asset Class	Long-Term Expected Asset Allocation	Long-Term Expected Real Rate of Return
Domestic equity.....	21.00%	6.16%
International developed markets equity..	13.00%	6.69%
International emerging markets equity...	5.00%	9.47%
Core fixed income.....	15.00%	1.89%
High yield fixed income.....	8.00%	4.00%
Real estate.....	10.00%	4.58%
Commodities.....	4.00%	4.77%
Hedge Fund, GTAA, Risk parity.....	11.00%	3.68%
Private equity.....	13.00%	10.00%
Total.....	100.00%	

Discount rate – The discount rate used to measure the total OPEB liability was 6.625% as of June 30, 2019, a decrease from the 6.75% discount rate used in the previous actuarial valuation. The projection of cash flows used to determine the discount rate assumed that contributions will be made in accordance with the Plan’s funding policy. Based on those assumptions, the OPEB plan’s fiduciary net position was projected to be sufficient to make all projected benefit payments to current plan members. Therefore, the long-term expected rate of return on the OPEB plan assets was applied to periods of projected future benefits payments.

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate – The following table presents the net other postemployment benefit liability and service cost, calculated using the discount rate of 6.625%, as well as what the net other postemployment benefit liability and service cost would be if it were calculated using a discount rate that is 1-percentage-point lower (5.625%) or 1-percentage-point higher (7.625%) than the current rate.

	1% Decrease (5.625%)	Current Discount Rate (6.625%)	1% Increase (7.625%)
Net OPEB liability..... \$	68,741,117	\$ 50,915,806	\$ 36,410,153

Sensitivity of the Net OPEB Liability to Changes in the Healthcare Trend – The following table presents the net other postemployment benefit liability and service cost, calculated using the current healthcare trend rate, as well

as what the net other postemployment benefit liability and service cost would be if it were calculated using a healthcare trend rate that is 1-percentage-point lower or 1-percentage-point higher.

	<u>1% Decrease</u>	<u>Current Trend</u>	<u>1% Increase</u>
Net OPEB liability.....	\$ 35,662,396	\$ 50,915,806	\$ 70,098,328

Changes of Assumptions - The December 31, 2018, actuarial valuation included the following changes of assumptions:

- The per capital health costs were updated to reflect current experiences.
- The trend assumptions were revised to reflect future expectations.
- The mortality assumptions were changed to match the assumptions used in the Town of Wellesley Contributory Retirement System Actuarial Valuation and Review as of January 1, 2017, dated October 26, 2017, and the Massachusetts Teachers’ Retirement System Actuarial Valuation Report as of January 1, 2018 dated October 10, 2018.
- The excise tax on high cost health plans beginning in 2022 was recalculated with this valuation.
- The expected rate of return, and the discount rate, was decreased from 6.75% to 6.625%.
- The future retiree plan enrollment assumption for actives increased from 115% to 125%.

Changes in Plan Provisions - The June 30, 2019, liability reflects the terms of the memorandum of agreement (MOA) effective July 1, 2018, concerning health insurance for Town employees and retirees. This includes changes to the retiree premium and the introduction of high deductible plans with a Health Savings Account and Health Reimbursement Account for non-Medicare retirees.

GASB Statement #75 – OPEB Employer Financial Reporting

Summary of Significant Accounting Policies – For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Plan and additions to/deductions from the Plan’s fiduciary net position have been determined on the same basis as they are reported by the Plan. For this purpose, the Plan recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value, except for money market investments and participating interest-earning investment contracts (repurchase agreements) that have a maturity at the time of purchase of one year or less, which are reported at cost.

Measurement Date – GASB Statement #75 requires the net OPEB liability to be measured as of a date no earlier than the end of the employer’s prior fiscal year and no later than the end of the employer’s current fiscal year, consistently applied from period to period. Accordingly, the net OPEB liability was measured as of June 30, 2018, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of June 30, 2016.

Plan Membership – The following table represents the Plan’s membership at June 30, 2018:

Active members.....	936
Inactive employees or beneficiaries currently receiving benefits.....	<u>928</u>
Total.....	<u>1,864</u>

Significant Actuarial Methods and Assumptions – The total OPEB liability in the June 30, 2016, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified, that was updated to June 30, 2018, to be in accordance with GASB Statement #75:

Valuation date.....	Actuarially determined contribution for fiscal year ending June 30, 2018 was determined with the June 30, 2016 actuarial valuation.
Actuarial cost method.....	Projected unit credit method.
Amortization method.....	Payments increase at 3.5%.
Remaining amortization period.....	21 years as of July 1, 2016, except 6 years as of July 1, 2016 for the Municipal Light Plan.
Asset valuation method.....	Fair value.
Discount rate/Investment rate of return...	6.75%
Inflation rate.....	3.50%
Health care trends rate.....	Medical and Prescription Drug: 7.0% decreasing by 0.5% for 4 years to an ultimate level of 5.0%. Medical Part B Premium 5.0%.
Mortality rates.....	Pre-Retirement (Non-Teachers): RP-2014 Blue Collar Healthy Employee Mortality Table with MP-2014 improvement projections backed out to a base year of 2006 and projected generationally with Scale BB2D. Healthy (Non-Teachers): RP-2014 Blue Collar Healthy Annuitant Mortality Table with MP-2014 improvement projections backed out to a base year of 2006 and projected generationally with Scale BB2D. Disabled (Non-Teachers): RP-2014 Blue Collar Healthy Annuitant Mortality Table with MP-2014 improvement projections based out to a base year with 2006 projected generationally with Scale BB2D set forward 3 years for males. Pre-Retirement (Teachers): RP-2014 Employee Mortality Table projected generationally with Scale BB2D from 2014. Healthy (Teachers): RP-2014 Healthy Annuitant Mortality Table projected generationally with Scale BB2D from 2014. Disabled (Teachers): RP-2014 Healthy Annuitant Table set forward 4 years projected generationally with Scale BB2D from 2014.

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target

asset allocation percentage and by adding expected inflation and subtracting expected investment expenses and a risk margin. The target allocation as of June 30, 2018 and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before investment expenses, used in the derivation of the long-term expected investment rate of return assumption are summarized in the following table:

Asset Class	Long-Term Expected Asset Allocation	Long-Term Expected Real Rate of Return
Domestic equity.....	17.50%	6.15%
International developed markets equity..	15.50%	7.11%
International emerging markets equity...	6.00%	9.41%
Core fixed income.....	12.00%	1.68%
High yield fixed income.....	10.00%	4.13%
Real estate.....	10.00%	4.90%
Commodities.....	4.00%	4.71%
Hedge Fund, GTAA, Risk parity.....	13.00%	3.94%
Private equity.....	12.00%	10.28%
Total.....	100.00%	

Discount rate – The discount rate used to measure the total OPEB liability was 6.75% as of June 30, 2018, the same discount rate that was used as of June 30, 2017. The projection of cash flows used to determine the discount rate assumed that contributions will be made in accordance with the Plan's funding policy. Based on those assumptions, the OPEB plan's fiduciary net position was projected to be available to make all projected benefit payments to current plan members. Therefore, the long-term expected rate of return on the OPEB plan assets was applied to periods of projected future benefits payments to determine the total OPEB liability.

Changes in the Net OPEB Liability

	Increase (Decrease)		
	Total OPEB Liability (a)	Plan	
		Fiduciary Net Position (b)	Net OPEB Liability (a) - (b)

Interest.....	7,990,117	-	7,990,117
Differences between expected and actual experience....	(5,332,500)	-	(5,332,500)
Changes of assumptions.....	(4,380,595)	-	(4,380,595)
Contributions - employer.....	-	8,724,519	(8,724,519)
Net investment income.....	-	5,307,352	(5,307,352)
Benefit payments.....	(5,078,148)	(5,078,148)	-
Net change.....	(3,007,800)	8,953,723	(11,961,523)
Balances at June 30, 2018.....	\$ 114,068,593	\$ 62,623,691	\$ 51,444,902

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate – The following table presents the net other postemployment benefit liability, calculated using the discount rate of 6.75%, as well as what the net other postemployment benefit liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current discount rate.

	1% Decrease (5.75%)	Current Discount Rate (6.75%)	1% Increase (7.75%)
Net OPEB liability.....	\$ 66,989,135	\$ 51,444,902	\$ 38,619,078

Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rates – The following table presents the net other postemployment benefit liability, calculated using the current healthcare trend rate of 5.00%, as well as what the net other postemployment benefit liability would be if it were calculated using a healthcare trend rate that is 1-percentage-point lower or 1-percentage-point higher.

	1% Decrease	Current Trend	1% Increase
Net OPEB liability.....	\$ 37,792,234	\$ 51,444,902	\$ 68,406,350

OPEB Expense and Deferred Outflows of Resources Related to OPEB – For the financial reporting year ended June 30, 2019 the Town recognized OPEB expense of \$5,532,164 and reported deferred outflows of resources related to OPEB from the following sources:

Deferred Category	Deferred Outflows of Resources	Deferred Inflows of Resources	Total
Differences between expected and actual experience.....	\$ -	\$ (4,443,750)	\$ (4,443,750)
Difference between projected and actual earnings.....	-	(2,972,803)	(2,972,803)
Changes in assumptions.....	-	(3,650,496)	(3,650,496)
Contributions made subsequent to the measurement date.....	3,645,843	-	3,645,843
Total deferred outflows/(inflows) of resources.....	\$ 3,645,843	\$ (11,067,049)	\$ (7,421,206)

Amounts reported as deferred outflows of resources related to OPEB will be recognized in OPEB expense in the following fiscal years:

Fiscal year ended June 30:	
2020.....	\$ 1,140,164
2021.....	(2,505,679)
2022.....	(2,505,680)
2023.....	(1,931,161)
2024.....	(1,618,850)
Total.....	\$ (7,421,206)

Changes of Assumptions – None.

Changes in Plan Provisions – None.

NOTE 13 – FINANCIAL STATEMENTS FOR INDIVIDUAL PENSION AND OTHER POSTEMPLOYMENT BENEFIT TRUST FUNDS

GAAP requires that all Pension and Other Postemployment Trust Funds be combined and presented in one column in the Fiduciary Funds financial statements and that the individual financial statements for each trust fund plan are reported in the notes to the financial statements. Provided below are the individual financial statements for the pension and OPEB plans that are included in the Fiduciary Funds as Pension and Other Postemployment Benefit Trust Funds.

	Pension Trust Fund (as of December 31, 2018)	Other Postemployment Benefit Trust Fund	Total Pension and Other Postemployment Benefit Trust Funds

NET POSITION AT END OF YEAR.....	\$ 187,948,601	\$ 69,983,462	\$ 257,932,063

NOTE 14 – COMMITMENTS

The Town is committed to completing various projects throughout the Town which will be funded with long-term debt totaling approximately \$11.9 million.

The Wellesley Municipal Light Plant (WMLP) purchases approximately 90% of its energy through its affiliation with Energy New England, LLC. The Plant has entered into tradeable hedging contracts with Energy New England, LLC through 2023.

The following are the Plant's future purchase commitments at June 30, 2019:

Energy Purchase Commitments				
Megawatt-Hour (MWH)				
Fiscal Year	Projected MWH's	Committed MWH's	Average Cost Per MWH	Total Commitments
2020	240,642	223,147	\$ 51	\$ 11,447,441
2021	240,022	242,206	50	12,115,144
2022	239,997	233,227	49	11,505,087
2023	239,914	223,862	49	11,031,919
2024	240,442	156,885	49	7,623,042
	<u>1,201,017</u>	<u>1,079,327</u>		<u>\$ 53,722,633</u>

Amounts are based on Energy New England's analysis, through June 2023, of the Plant's firm commitment with respect to future energy purchases. The WMLP has locked-in energy prices through this period that are approximately \$3.6 million above market prices as of June 30, 2019. However, these hedge rates may not necessarily be lower than historical rates paid for prior year's purchased power.

NOTE 15 – CONTINGENCIES

The Town participates in a number of federal award programs. Although the grant programs have been audited in accordance with the provisions of *Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* through June 30, 2019, these programs are still subject to financial and compliance audits. The amount of expenditures which may be disallowed by the granting agencies cannot be determined at this time, although it is expected that such amounts, if any, would be immaterial.

Various legal actions and claims are pending. Litigation is subject to many uncertainties, and the outcome of individual litigated matters is not always predictable. Although the amount of liability, if any, at June 30, 2019, cannot be ascertained, management believes any resulting liability should not materially affect the financial position at June 30, 2019.

NOTE 16 – SUBSEQUENT EVENTS

Management has evaluated subsequent events through November 4, 2019, which is the date the financial statements were available to be issued.

NOTE 17 – IMPLEMENTATION OF NEW GASB PRONOUNCEMENTS

During 2019, the following GASB pronouncements were implemented:

- GASB Statement #83, *Certain Asset Retirement Obligations*. This pronouncement did not impact the basic financial statements.
- GASB Statement #88, *Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements*. This pronouncement did not impact the basic financial statements.

The following GASB pronouncements will be implemented in the future:

- The GASB issued Statement #84, *Fiduciary Activities*, which is required to be implemented in 2020.
- The GASB issued Statement #87, *Leases*, which is required to be implemented in 2021.
- The GASB issued Statement #89, *Accounting for Interest Cost Incurred before the End of a Construction Period*, which is required to be implemented in 2021.
- The GASB issued Statement #90, *Majority Equity Interests – an amendment of GASB Statements #14 and #61*, which is required to be implemented in 2020.
- The GASB issued Statement #91, *Conduit Debt Obligations*, which is required to be implemented in 2022.

Management is currently assessing the impact the implementation of these pronouncements will have on the basic financial statements.

Pension Plan Schedules – Retirement System

The Pension Plan's Schedule of Changes in Net Pension Liability presents multi-year trend information on the Plan's net pension liability and related ratios.

The Pension Plan's Schedule of Contributions presents multi-year trend information on the required and actual contributions to the pension plan and related ratios.

The Pension Plan's Schedule of Investment Return presents multi-year trend information on the money-weighted investment return on retirement assets, net of investment expense.

These schedules are intended to present information for ten years. Until a ten year trend is compiled, information is presented for those years for which information is available.

June 30, 2015.....	6,983,288	(6,983,288)	-	35,580,566	19.63%

Note: this schedule is intended to present information for 10 years.
Until a 10-year trend is compiled, information is presented for those years for which information is available.

See notes to required supplementary information.

**SCHEDULE OF THE SPECIAL FUNDING AMOUNTS
OF THE NET PENSION LIABILITY
MASSACHUSETTS TEACHERS' RETIREMENT SYSTEM**

The Commonwealth of Massachusetts is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of the member employers which creates a special funding situation. Therefore, there is no net pension liability to recognize. This schedule discloses the Commonwealth's 100% share of the associated collective net pension liability; the portion of the collective pension expense as both a revenue and pension expense recognized; and the Plan's fiduciary net position as a percentage of the total liability.

Year	Commonwealth's 100% Share of the Associated Net Pension Liability	Expense and Revenue Recognized for the Commonwealth's Support	Plan Fiduciary Net Position as a Percentage of the Total Liability
2019.....	\$ 175,120,312	\$ 17,745,908	54.84%
2018.....	166,750,488	17,404,234	54.25%
2017.....	161,173,004	16,440,703	52.73%
2016.....	145,970,533	11,839,507	55.38%
2015.....	113,081,320	7,856,302	61.64%

Note: this schedule is intended to present information for 10 years.
Until a 10-year trend is compiled, information is presented for those years for which information is available.

See notes to required supplementary information.

Other Postemployment Benefit Plan Schedules

The Schedule of Changes in the Town's Net Other Postemployment Benefit Liability and Related Ratios presents multi-year trend information on changes in the Plan's total OPEB liability, changes in the Plan's net position, and ending net OPEB liability. It also demonstrates the Plan's net position as a percentage of the total liability and the Plan's net other postemployment benefit liability as a percentage of covered employee payroll.

The Schedule of the Town's Contributions presents multi-year trend information on the Town's actual contributions to the other postemployment benefit plan and related ratios.

The Schedule of Investment Return presents multi-year trend information on the money-weighted investment return on the Plan's other postemployment assets, net of investment expense.

These schedules are intended to present information for ten years. Until a ten year trend is compiled, information is presented for those years for which information is available.

See notes to required supplementary information.

NOTE A – STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

A. Budgetary Information

Municipal Law requires the adoption of a balanced budget for the general fund that is approved at the Annual Town Meeting. The Town has an Advisory Committee that submits reports on proposed appropriations at Town Meetings. The appropriated budget is prepared by fund, function and department. Transfers of appropriations among departments require the approval of Town Meeting.

The majority of appropriations are non-continuing which lapse at the end of each year. Others are continuing appropriations for which the governing body has authorized that an unspent balance from a prior year be carried forward and made available for spending in the current year. These carry forwards are included as part of the subsequent year’s original budget.

In the budgetary schedule, revenues are reported on a cash basis and expenditures that relate to the current year appropriations are recorded when incurred. Generally, expenditures may not exceed the legal level of spending (salaries, expenses and capital) authorized for an appropriation account. However, the payment of debt service is statutorily required, regardless of whether such amounts are appropriated. Additionally, expenditures for disasters, natural or otherwise, and final judgments may exceed the level of spending authorized by two-thirds majority vote of the Board of Selectmen and written approval from the Massachusetts Department of Revenue.

An annual budget is adopted for the general fund in conformity with the guidelines described above. The original 2019 budget included \$165.3 million in appropriations and other amounts to be raised and \$9.9 million in amounts carried over from previous years. During 2019, the Town approved \$2.8 million of supplemental appropriations primarily for snow and ice costs, and capital improvement costs. These supplemental appropriations were financed through the use of free cash.

The Financial Services Department has the responsibility to ensure that budgetary control is maintained. Budgetary control is exercised through the accounting system.

B. Budgetary – GAAP Reconciliation

For budgetary financial reporting purposes, the Uniform Municipal Accounting System basis of accounting (established by the Commonwealth) is followed, which differs from the GAAP basis of accounting. A reconciliation of budgetary-basis to GAAP-basis results for the general fund for the year ended June 30, 2019, is presented below:

Net change in fund balance - budgetary basis.....	\$ 1,345,411
<u>Perspective differences:</u>	
Activity of the stabilization fund recorded in the general fund for GAAP.....	864,030
<u>Basis of accounting differences:</u>	
Net change in recording tax refunds payable.....	(321,216)
Net change in recording 60 day receipts.....	73,000
Net change in recording accrued expenditures.....	(161,786)
Recognition of revenue for on-behalf payments.....	17,746,000
Recognition of expenditures for on-behalf payments.....	<u>(17,746,000)</u>
Net change in fund balance - GAAP basis.....	<u>\$ 1,799,439</u>

NOTE B – PENSION PLAN***Pension Plan Schedules – Retirement System*****A. Schedule of Changes in the Net Pension Liability and Related Ratios**

The Schedule of Changes in the Net Pension Liability and Related Ratios includes the detailed changes in the systems total pension liability, changes in the systems net position, and the ending net pension liability. It also demonstrates the plan's net position as a percentage of the total pension liability and the net pension liability as a percentage of covered payroll.

B. Schedule of Contributions

Governmental employers are required to pay an annual appropriation as established by PERAC. The total appropriation includes the amounts to pay the pension portion of each member's retirement allowance, an amount to amortize the actuarially determined unfunded liability to zero in accordance with the system's funding schedule, and additional appropriations in accordance with adopted early retirement incentive programs. The total appropriations are payable on July 1 and January 1. Employers may choose to pay the entire appropriation in July at a discounted rate. Accordingly, actual employer contributions may be less than the "total appropriation". The pension fund appropriations are allocated amongst employers based on covered payroll.

C. Schedule of Investment Return

The money weighted rate of return is calculated as the internal rate of return on pension plan investments, net of pension plan investment expense. A money weighted rate of return expresses investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested. Inputs to the money weighted rate of return calculation are determined monthly.

Pension Plan Schedules - Town**A. Schedule of the Town's Proportionate Share of the Net Pension Liability**

The Schedule of the Town's Proportionate Share of the Net Pension Liability details the allocated percentage of the net pension liability (asset), the proportionate share of the net pension liability, and the covered employee payroll. It also demonstrates the net position as a percentage of the pension liability and the net pension liability as a percentage of covered payroll.

B. Schedule of Town's Contributions

Governmental employers are required to pay an annual appropriation as established by PERAC. The appropriation includes the amounts to pay the pension portion of each member's retirement allowance, an amount to amortize the actuarially determined unfunded liability to zero in accordance with the system's funding schedule, and additional appropriations in accordance with adopted early retirement incentive programs. The appropriations are payable on July 1 and January 1. The Town may choose to pay the entire appropriation in July at a discounted rate. Accordingly, actual contributions may be less than the "total appropriation". The pension fund appropriation is allocated to the Town based on covered payroll.

C. Schedule of the Special Funding Amounts of the Net Pension Liabilities

The Commonwealth of Massachusetts is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of the member employers which creates a special funding

situation. Since the Town does not contribute directly to MTRS, there is no net pension liability to recognize. This schedule discloses the Commonwealth's 100% share of the collective net pension liability that is associated with the Town; the portion of the collective pension expense as both revenue and pension expense recognized by the Town; and the Plan's fiduciary net position as a percentage of the total liability.

Changes in Assumptions:

- The investment return assumption was reduced from 6.75% to 6.625%. A reduction in the investment return assumption increases the plan's liabilities.
- The mortality assumption was changed from the RP-2014 Blue Collar Employee and Healthy Annuitant Mortality Tables with MP-2014 improvement projections backed out to a base year of 2006 and projected generationally with Scale BB to the RP-2014 Blue Collar Healthy Employee and Annuitant Mortality Tables set forward one year for females projected generationally with scale MP-2016.
- The mortality assumption for disabled participants was changed from the RP-2014 Blue Collar Healthy Annuitant Mortality Table projected with MP- improvement projections backed out to a base year of 2006 and projected generationally with Scale BB set forward 3 years for males to the RP-2000 Healthy Annuitant Mortality Table projected generationally with Scale BB from 2015.
- The administrative expense assumption was increased from \$250,000 to \$275,000.
- The inflation rate was lowered from 3.5% to 2.75%.
- The Cost of Living Adjustment (COLA) assumption was changed from a 3% increase on the first \$15,000 of retirement allowance to a 2.75% increase on the first \$17,000 of retirement allowance.

Changes in Plan Provisions:

- With the exception of fiscal year 2021 and later years in the funding schedule, this valuation reflects the increase in the COLA base from \$15,000 to \$17,000.
- Fiscal 2021 and late years in the funding schedule reflect the increase in the COLA base to \$18,000 effective July 1, 2020.

NOTE C – OTHER POSTEMPLOYMENT BENEFITS

The Town administers a single-employer defined benefit healthcare plan ("The Other Postemployment Benefit Plan"). The plan provides lifetime healthcare and life insurance for eligible retirees and their spouses through the Town's group health insurance plan, which covers both active and retired members.

The Other Postemployment Benefit Plan

The Schedule of Changes in the Town's Net Other Postemployment Benefit Liability and Related Ratios

The Schedule of Changes in the Town's Net Other Postemployment Benefit Liability and Related Ratios presents multi-year trend information on changes in the Plan's total OPEB liability, changes in the Plan's net position, and ending net OPEB liability. It also demonstrates the Plan's net position as a percentage of the total liability and the Plan's net other postemployment benefit liability as a percentage of covered-employee payroll.

Schedule of the Town’s Contributions

The Schedule of the Town’s Contributions includes the Town’s annual required contribution to the Plan, along with the contribution made in relation to the actuarially determined contribution and the covered-employee payroll. The Town is not required to fully fund this contribution. It also demonstrates the contributions as a percentage of covered-employee payroll. Methods and assumptions used to determine contribution rates are as follows:

Valuation date.....	Actuarially determined contribution for the fiscal year ending June 30, 2019 was determined with the December 31, 2018 actuarial valuation.
Actuarial cost method.....	Entry age normal cost method.
Amortization method.....	Payments increase at 3.0% per year.
Remaining amortization period.....	19 years as of July 1, 2018.
Asset valuation method.....	Fair value.
Discount rate/Investment rate of return.....	6.625%
Inflation rate.....	3.00%
Health care trends rate.....	Medical and Prescription Drug: 7.0% decreasing by 0.5% each year to an ultimate level of 4.5% per year. Medical Part B Premium: 4.5%.
Mortality rates.....	Pre-Retirement (Non-Teachers): RP-2014 Blue Collar Employee Mortality Table projected generationally with Scale MP-2016 set forward one year for females. Healthy (Non-Teachers): RP-2014 Blue Collar Healthy Annuitant Mortality Table projected generationally with Scale MP-2016 set forward one year for females. Disabled (Non-Teachers): RP-2000 Healthy Annuitant Mortality Table projected generationally with Scale BB2D from 2015. Pre-Retirement (Teachers): RP-2014 White Collar Employee Mortality Table projected generationally with Scale MP-2016. Healthy (Teachers): RP-2014 White Collar Employee Mortality Table projected generationally with Scale MP-2016. Disabled (Teachers): RP-2014 White Collar Employee Mortality Table projected generationally with Scale MP-2016.

Schedule of Investment Return

The Schedule of Investment Return includes the money-weighted investment return on the Plan's other postemployment assets, net of investment expense.

Changes of Assumptions

The December 31, 2018 actuarial valuation included the following changes of assumptions:

- The per capital health costs were updated to reflect current experiences.
- The trend assumptions were revised to reflect future expectations.
- The mortality assumptions were changed to match the assumptions used in the Town of Wellesley Contributory Retirement System Actuarial Valuation and Review as of January 1, 2017, dated October 26, 2017, and the Massachusetts Teachers' Retirement System Actuarial Valuation Report as of January 1, 2018 dated October 10, 2018.
- The excise tax on high cost health plans beginning in 2022 was recalculated with this valuation.
- The expected rate of return, and the discount rate, was decreased from 6.75% to 6.625%.
- The future retiree plan enrollment assumption for actives increased from 115% to 125%.

Changes in Plan Provisions

The June 30, 2019 liability reflects the terms of the memorandum of agreement (MOA) effective July 1, 2018, concerning health insurance for Town employees and retirees. This includes changes to the retiree premium and the introduction of high deductible plans with a Health Savings Account and Health Reimbursement Account for non-Medicare retirees.

Combining and Individual Fund Statements

Nonmajor Governmental Funds

SPECIAL REVENUE FUNDS

Special Revenue Funds are used to account for specific revenue sources that are restricted by law or administrative action to expenditures for specific purposes.

School Lunch Fund – This fund accounts for the school cafeteria activities and is funded by user fees and grants.

Community Preservation Fund – This fund is used to account for funds received in accordance with the Community Preservation Act (the CPA). Funds are received under the CPA through a surcharge of 1% of the real property tax levy and matching state grants. The funds are spent for the acquisition, creation and preservation of open space, historic resources and affordable housing.

Grants Fund – This fund accounts for Federal and state grants which are designated for specific programs.

Receipts Reserved Fund – This fund accounts for specific receipts identified by the Commonwealth that are to be held until appropriated.

Revolving Fund – This fund accounts for self-supporting programs sponsored by the Town.

Recreation Revolving Fund – This fund accounts for self-supporting recreational programs sponsored by the Town's recreation department.

Other – This fund accounts for all other legally established special revenues where the funds are spent on governmental purposes.

PERMANENT FUND

The Permanent Fund is used to report resources that are legally restricted to the extent that only earnings, not principal, may be used for purposes that support the Town's programs. The Town maintains one fund to account for nonexpendable contributions and expendable earnings that can be spent on governmental purposes.

Internal Service Funds

Internal service funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the government and to other governmental units, on a cost reimbursement basis.

Fleet Maintenance Fund – This fund is used to account for the maintenance and fuel costs of all Town vehicles.

Health Insurance Fund – This fund is used to account for the payment of health and other employee benefit programs.

Unemployment Fund – This fund is used to account for required unemployment benefits of former Town employees.

Workers Compensation Fund – This fund is used to account for self-insured activities of providing workers compensation benefits to Town employees.

Statistical Section

Statistical tables differ from financial statements since they usually cover more than one fiscal year and may present non-accounting data. The following tables reflect social and economic data, financial trends, and fiscal capacity.

New copper gutters from the Wellesley Town Hall exterior renovation.

Town of Wellesley, Massachusetts
Comprehensive Annual Financial Report
For the year ended June 30, 2019

Statistical Section

This part of the Town of Wellesley's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the Town's overall financial health.

Financial Trends

- These schedules contain trend information to help the reader understand how the Town's financial performance and well-being have changed over time.

Revenue Capacity

- These schedules contain information to help the reader assess the Town's most significant local revenue source, the property tax.

Debt Capacity

- These schedules present information to help the reader assess the affordability of the Town's current levels of outstanding debt and the Town's ability to issue additional debt in the future.

Demographic and Economic Information

- These schedules offer demographic and economic indicators to help the reader understand the environment within which the Town's financial activities take place.

Operating Information

- These schedules contain service and infrastructure data to help the reader understand how the information in the Town's financial report relates to the services the Town provides and the activities it performs.

SOURCES: Unless otherwise noted, the information in these schedules is derived from the audited financial reports for the relevant year.

Notes: In 2015 Intergovernmental revenues and Teacher's pension benefits were lower due to the way the State calculated these amounts in that year.
In 2017 the Town CAFR renamed/revised the functional expenditure groupings. Functional groupings prior to 2017 were not revised.

Source: Assessor's Department, Town of Wellesley
All property in the Commonwealth of Massachusetts is assessed at 100% of fair cash value.

Note: Chapter 59, Section 21C of the Massachusetts General Laws, known as "Proposition 2 1/2", imposes 2 separate limits on the annual tax levy of the Town. The primary limitation is that the tax levy cannot exceed 2 1/2 percent of the full and fair cash value. The secondary limitation is that the tax levy cannot exceed the maximum levy limit for the preceding fiscal year as determined by the State Commissioner of Revenue by more than 2 1/2 percent, subject to an exception for property added to the tax rolls and for certain substantial valuation increases other than as part of a general revaluation. The secondary limit may be exceeded in any year by a majority vote of the voters, however it cannot exceed the primary limitation.

Direct and Overlapping Governmental Activities Debt

As of June 30, 2019

<u>Town of Wellesley, Massachusetts</u>	<u>Debt Outstanding</u>	<u>Estimated Percentage Applicable</u>	<u>Estimated Share of Overlapping Debt</u>
Debt repaid with property taxes:			
Norfolk County.....	\$ 13,175,000	8.66%	\$ 1,140,955
Town direct debt.....	<u>126,545,700</u>		<u>126,545,700</u>
Total direct and overlapping debt.....	<u>\$ 139,720,700</u>		<u>\$ 127,686,655</u>

The overlapping debt percentage used to arrive at the Town's share of the total Norfolk County outstanding debt is the ratio of the Town's operating assessment for FY19 paid to the County divided by the total of all assessments paid by each municipality within the jurisdictional boundary of the County.

Source: Various Town Departments

(1) The eBook collection is lower in 2017 as a result of a vendor changing contracts to reduce the number of available titles and increase the quality of selection.

(2) The LED lighting project decreased usage beginning in 2019.

Source: Various Town Departments, Payroll count

*School Lunch outsourced in FY12, therefore FTE count omits these employees.

* Public Education employee count was recast and is now based on numbers provided in the School Budget.

* Library lost two full time custodians to General Government in 2013.
